WEIGHT PER M²	18kg – saturated weight may be up to 22kg
GRASS HEIGHT ON DESPATCH	Approx. 25mm (1")

All measurements are approximate and taken when harvested.

A RESILIENT, LOW-INPUT LAWN FOR SHADED, DOMESTIC AND COMMERCIAL SPACES. STAYS GREEN IN DROUGHT, BOOSTS BIODIVERSITY, NEEDS MINIMAL FEEDING AND MAINTENANCE, AND PERFORMS RELIABLY ACROSS UK SOIL TYPES

GROWTH

Harrowden Clover Rich Lawn is grown for 12 months and contains no plastic netting. The fine fescues in the mix give it a neat, close-cut finish and cope well with low fertiliser, shade and dry conditions. Strong and Slender Creeping Red Fescue help provide a dense root structure, while Chewings Fescue adds a fine texture and keeps maintenance low. Smooth Stalked Meadow Grass brings extra strength and wear tolerance. Microclover is included to naturally fix nitrogen, improving colour, drought resilience and overall plant health without relying on heavy inputs. Clover Rich Lawn is supplied with mature plants, strong root fibre and enough soil to support establishment, and each roll is grown to be firm and stable when lifted from one end.

TYPICAL SEED MIXTURE*	Strong Creeping Red Fescue Chewings Fescue Slender Creeping Red Fescue Smooth Stalked Meadow Grass Microclover
SOIL CLASSIFICATION	Grown on free draining DEFRA classified grade 1 mineral sand or organic loams.
