CDTS

Hydroseeding  
Revegetation  
Erosion Control

## Roman Heights SUDS pond

Due to the new housing boom CDTS have been hydroseeding a lot of SUDS ponds for various house builders and Landscape Contractors. This particular scheme we did for Shines landscapes at their Roman Heights development in Cannock. This picture was taken four weeks after hydroseeding in September 2021.

CDTS use Groweb hydroseeding material which are safe to use by water courses as they are 100 % organic natural based products.
