

## **COLD SEAL PAINT**

### **GENERAL INFORMATION**

A general purpose cold applied emulsion for joint paint of vertical joints.

Quick drying. Under normal condition will be dry in 30 minutes.

A damp soft fibre head brush should be used to apply of vertical joints. Alternatively, Cold Seal Paint can be poured out of a spouted can.

Manufactured in accordance with a C67B0 cationic emulsion with the addition of a thickening additive to give a thixotropic product to ensure adhesion to the vertical face.

### **CHARACTERISTICS**

Property	Units	Test Method	Specified Limit(s)
Penetration at 25°C	dmm	EN1426	50-70
Softening Point	°C	EN1427	≥ 45
Ductility Recovery at 25°C minimum	%	EN13398	20 – 30

### **STORAGE GUIDANCE**

The container contents should be agitated to a fully homogenous state regularly. Keep out of direct sunlight and protect from frost.
