

HOARD FENCE®

external screening system for rapid segregation

COMPANY:
MTG Building Services

LOCATION:
Woodford Green, Essex

OVERVIEW:
Site hoarding

SOLUTION:
**Hoardfence
22m (w) x 2.7m (h)**

WHAT DID THEY SAY:

“It was a pleasure once again to work with Westgate whom we have a long standing relationship with for internal hoarding, however this was the first time we have used Hoardfence.

It was the perfect solution for our site hoarding on this project in Woodford Green and the benefits in lieu of the traditional plywood installed, painted hoarding, which the industry has adopted for many years”.

MTG Building Services were undertaking a refurbishment project at Monkey Puzzle Day Nursery in Essex.

Hoardfence is a cost-effective external hoarding solution, with rapid installation and a smart, professional finish. Steel galvanised posts used can be locked into perfect plumb using an infinitely variable hitch, meaning uneven ground is no problem. It's also a sustainable system as it can be demounted and re-installed a number of times and the uPVC hoarding panels are 100% recyclable.

A total of 22 linear metres of 2.7m high Hoardfence was installed, with concrete block ballasts, a vehicle gate and pedestrian door. The system was hired for a 12 week period.

Graphics and signage can be added for promotional or safety reasons, and in this case the client decided to add colourful vinyls to advertise the nursery.

"Our client Monkey Puzzle Day Nurseries saw this as a branding opportunity to promote themselves in the local area to great effect and the hoarding has come to life – everyone on site is proud of the end product we hope this sets the benchmark for all our future sites"
