June 2014

**Contract Value:**  
£59,500

**Job Type:**  
Supply & Install

RECYCLED PLASTIC PLINTH MOUNTED BENCHING (SBN310)

PLAYGROUND STORAGE BOX AND BENCHING (SSB300)

The City Heights E-ACT Academy shares a site with Fenstanton Primary School, the modern buildings are typical of city built schools and have a very high specification, ultimately 1100 pupils will attend these facilities. We provided a range of external furniture items and agility play equipment. Recycled plastic slats and galvanised frames ensure benches, litter containers, table & bench sets are hard wearing and require minimal maintenance. At the front of the impressive building our Malford cycle shelters and racks provide safe and secure cycle storage for pupils and staff.

For Fenstanton Primary School we supplied cycle shelters and racks, an outdoor teaching tensile canopy, planters, storage benches, storage sheds, a playhouse and many items of play equipment and play panels.
