We were delighted to secure this batch of schools under the Priority Schools Building Programme, we were able to provide all elements of the external furniture, cycle shelters and canopies as part of a comprehensive package of products. The products were selected for their excellent performance characteristics and cost effective pricing. With 12 schools in the batch we were able to assist Morgan Sindall, achieve batch wide synergy and keep administration and site liaison to a minimum. Our dedicated Project Team liaising with site all the way through to achieve the multiple deadlines that projects like this require.
