Oobe
 Adriana Oliveros (Senior Landscape Architect)

We were delighted to secure another batch of schools under the Priority Schools Building Programme, we were able to provide all elements of the external furniture, cycle shelters and canopies as part of a comprehensive package of products. The products were selected for their excellent performance characteristics and cost effective pricing. With 8 schools in the batch we were able to assist Carillion, achieve batch wide synergy and keep administration and site liaison to a minimum. Our dedicated Project Team liaising with site all the way through to achieve the multiple deadlines that projects like this require.
