St Mary Magdalene C of E School is located on the Greenwich Peninsula and was recently expanded from a primary school into a new all-through education facility catering for over 1600 students and 300 staff. Langley Design were chosen by BAM Construction on this large scheme to provide a vast array of street furniture products. As the school covers 2 hectares of land, there was a need for seating areas for the children to enjoy during break times. Langley Design manufactured matching picnic tables to go with the benches to complete a site wide aesthetic. We also supplied and installed a number of our Sheldon cycle shelters to provide secure parking areas for the children to store their bicycles and scooters. Finally, we were also tasked with manufacturing a fully covered and secure timber bin store. Our bespoke manufacturing capabilities enabled us to produce fantastic looking products whilst meeting the design requirements for the client.
