MALFORD SEDUM ROOF STEEL CYCLE SHELTER - MCS213

GREEN ROOF CYCLE SHELTER - MCS213

MCS213

Nexus is a new 6 story innovation and enterprise centre at the University of Leeds. This has been designed to allow businesses and other external organisations looking to innovate, grow and be more productive work in partnership with University's capabilities and talent.

Langley Design were delighted to be chosen by Galliford Try to work on this project. Having built up the reputation as the leading timber sedum roof cycle shelter it was a nice challenge for us to produce a unit manufactured out of Galvanised and Powder coated Steel. The colour of the steel against the Sedum produces a beautiful contrast and its great news for Langley to be able to offer Steel Sedum Roof cycle shelters alongside the timber range.
