MALFORD DOOR BARRIER - MDB203

SHELDON BENCH - SBN332

MALFORD CANOPY - MCP326/NS

LANGLEY LITTER CONTAINER - LLC104

Langley Design worked with Morgan Sindall on the £9 million Calthorpe Park School project in Fleet, North-East Hampshire where we manufactured and installed a package of street furniture products. As a bespoke manufacturer, we were able to construct two steel canopies with a powdercoated finish to match the architects design. One of which is used for cycle parking and the other is an outdoor covered seating area which can be used for many purposes including teaching, socialising and dining. We also furnished the courtyard spaces with a number of benches, litter bins and door barriers. The school opted for Douglas fir timber with a powdercoated finish to complement the school's colour scheme.
