

Fusion Point One is a multi-million pound office refurbishment in Cardiff providing sustainable and energy efficient accommodation for its users. Langley Design worked closely with Paramount Interiors to produce a bespoke cycle storage solution for the buildings new external spaces. Providing a capacity of 98 cycle spaces we utilised our Sheldon secure cycle shelter (SCS316) and Malford Semi Vertical cycle racks (MCR206) to create an attractive and robust storage facility for the buildings cyclists. We also offered an adaption to our popular Langley bench (LBN107), adding some additional timbers to the front and back faces which provides a comfortable and visually appealing touch to a Langley classic. To round off the external works we provided our timber planters, available in a variety of shapes and sizes to suit any projects requirement. These planters offer a cost effective and coordinated look to the finished space.
