

Cheshire College South & West is a former further education college, located in Crewe, Cheshire with state-of-the-art facilities and amazing student support. Langley Design were approached by the college directly as they had a requirement for a timber smoking shelter to provide a sheltered area and protection from the elements for the students. As a bespoke manufacturer, we were able to design a faceted version of our popular Sheldon Smoking Shelter SSS304 to satisfy the clients requirements. Constructed with structurally graded Class 4 Treated Redwood and clad to the back and sides with premium Hardwood Iroko the shelter fits perfectly into the newly landscaped areas. The shelter can additionally be used for many purposes such as a waiting area, storage space or simply just for socialising.

Langley Design as a leading supplier of street furniture products to all sectors of the built environment offer a full range of benches, seats, cycle shelters, bin store and canopies for a variety of projects. Located within the heart of the Cotswolds and offering both supply only & supply and installation services. At Langley we pride ourselves on our problem-solving solutions so please get in contact if you have a requirement on your future projects.
