

# TerraCottem arbor

Developed specifically for tree and shrub planting. A mix of specialist polymers, growth precursors and volcanic rock act to enhance water retention, soil structure and microbiological activity while a mix of tree specific fertilisers aid rapid plant establishment for the vital first 12 months after planting. Tree survival rates are increased reducing replacement costs.

**Applications:**

- Tree planting
- Shrub planting

**Benefits:**

- Produces healthier plants
- Increase yields and survival rates
- Increases water retention capacity
- Stronger deeper root development
- Faster and better plant establishment
- Higher resistance to drought stress and diseases

**Application Rate:** 1.5kg/m<sup>2</sup>

**Application Frequency:** Once when tree and shrub planting

**Composition:**

Mixture of cross-linked hydroabsorbent polymers	36.25%
Fertilisers	14.50%
N total	3%
P <sub>2</sub> O <sub>5</sub> soluble in mineral acid	1%
K <sub>2</sub> O soluble in water	7%
Micronutrients	B, Cu, Fe, Mn, Mo, Zn
Growth Precursors	0.25%
Humic Acids	0.75%
Volcanic Rock	49.75%
