

Laser Cut Tree Grille – Planet Square Stainless Steel

Material:

Laser Cut Tree Grilles can be manufactured in stainless steel (grades 304 & 316 available), mild steel or corten steel.

Finish:

Stainless Steel finished brush polished. Other polish finishes or mill finished also available. Mild steel grilles are finished galvanised and can be powder coated in any RAS/BS colour if needed. Corten steel grilles are left bare metal to passivate to a rust coloured finish.

Dimensions:

Laser Cut Tree Grilles are available in sizes from 800mm to 2500mm². Other sizes, rectangular and hexagonal laser cut grilles are also available.

Design Options:

Laser Cut Tree Grilles can have design alterations or be manufactured to a completely bespoke design if required.

Technical Specification:

Laser Cut Tree Grilles can be manufactured to accept irrigation units, tree guards and uplighters.
