

Cyclone

Description

Spinning the wheel will set the ball bearings inside the wheel into motion to mimic the sound of falling rain.

From a gentle pitter-patter through a heavy rain shower to a full-on monsoon, players can control the intensity of the rain sound by how hard they spin the wheel, demonstrating the concept of cause and effect and encouraging gross motor skills.

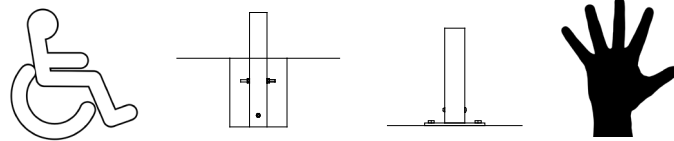

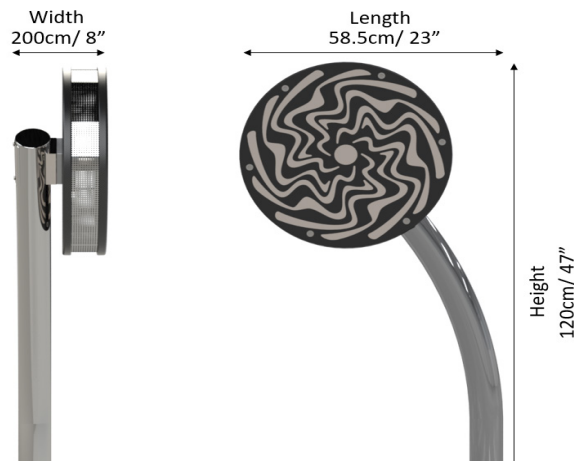

Materials and Features

- 316 mirror polished marine grade stainless steel stand.
- HDPE wheel faces.
- Stainless steel mesh.
- Stainless steel ball bearings.
- Vandal resistant fixings.

Tuning and Sound Level Data

Unpitched Percussion
