### Instrument Components:

x4

M8 Barrel Nuts

x4

M6 Saddle Straps

x8

M6x20mm Secure Screw

x4

M8 Square Nut

x4

M6x12mm Secure Screw

x4

M8 Nyloc Nut

Metric Conversion:  
250mm/ 10"  
550mm/ 22"  
1240mm/ 49"  
1.5m/ 59"

(1.1)

1. Attach M10x150 Bar and Nuts to each of the 3 Legs.  
**(1.1) (See Assembly Guide)**

2. Use wooden jig to mark out hole positions for each of the 3 legs in desired location upon decision from customer.

3. Excavate 3 holes for the Steel legs 250mm diameter by 550mm deep. (See GF Post Installation Sheet)

4. Locate (lower) legs into holes making sure they are vertical and level and use jig to check positioning.

5. Once happy with location of the Instrument, **fill** hole using rapid hardening **concrete**. Be sure to compact concrete around legs and leave to dry according to manufactures guidelines, making sure to leave jig in place until set.

6. Once concrete has set, remove wooden jig and install notes using Fixings provided. Finally install beaters using fixings provided.  
**(See Assembly Guide)**

Install Instrument with 1.5m free space (from widest point) around it.

**CAUTION:** Papilio surface can get hot in direct sunlight, if possible install in shaded areas.

Weight of heaviest part **13kg** (Notes)

Single Small Red Beaters X4

Ground Fix Components:

x6  
M10x200 Threaded Bar

x12  
M10 Nut

Spares available from [percussionplay.com](http://percussionplay.com) or from your local distributor

36 Kg

Tools:

TX 30 Driver Bit x1 TX 40 Driver Bit x1
