

In 2022 the UK temperature soared to 40.3°C - The hottest UK temperature on record

In 2022 the second highest monthly average temperature was recorded in Europe

2022 was the third hottest June in the world

"Heat waves are expected to become more frequent, more intense and longer lasting"
Valérie Masson-Delmotte, co-chair of group I of the IPCC

Sustainability: Three Pillars

Help communities enjoy
outdoor public spaces
by creating climate shelters

Responsible
water
consumption

Low consumption
Easy installation
Low maintenance
