

Proludic® 

Designer of play and sports areas

Proludic, an entire team at your service

The staff at Proludic have extensive experience in the play, outdoor gym and sports area industry. As a Proludic client, you will be able to access a dedicated project team, which includes your own assigned Area Manager, Customer Service Advisor and skilled Designer or Landscape Architect.

This combined knowledge and expertise ensure you receive the highest level of customer care, from the initial planning stage right through to project completion.

Proludic supports you from start to finish – and beyond! From the first steps of raising funds and developing your vision, we define the project specifications and manage the planning process with consideration of all details.

These include site evaluations, equipment suitability and landscape integration. All aspects of the project design and delivery are looked at to provide you with the best outcome for your area. The final proposal will have supporting 2D plans and 3D visuals so you can truly see your vision come to life.

We also offer a comprehensive After Sales & Maintenance team who are on hand with service cover for the lifetime of your play and sports area.

**Contact your local Area Manager
directly from our website:
www.proludic.co.uk/contact-us/**

We are active members of the API (Association of Play Industries) and are accredited by both Constructionline and CHAS (The Contractors Health and Safety Assessment Scheme). All our products are independently tested and certified to European Play Standard EN1176 and EN16630 for outdoor fitness equipment. Proludic is also CPD (Continuing Professional Development) accredited.

INCLUSION LEVEL

The stated inclusion level determines how accessible our equipment is to a child with motor impairments.

At least 1 activity accessible

Presence of a ramp or transfer point or equipment totally accessible

ANCHORING THE EQUIPMENT

Type A
*JXXXA: Anchored under ground in a concrete footing.

Type B
*JXXXB: Fixing on a concrete slab that has already been laid or will be laid before the equipment is installed.

FOR 35 YEARS, Proludic has been designing, manufacturing and installing playgrounds and sports areas around the world

Our mission

True to our values, we are focused on our mission of creating playgrounds and sports areas where users can thrive, develop their skills and improve their well-being.

We design, manufacture and install products and play spaces offering the highest quality and safety. Our universal, innovative and

inclusive solutions are tailored to meet the wide range of needs among children, teenagers and adults.

We also strive to transform play areas into social hubs that promote and enhance community life.

Our values

Experience

Proludic draws on the operational expertise it has developed since 1988 to provide customers with superior support and guidance in developing and implementing their projects.

Innovation

Proludic harnesses its collective driving force to extend and upgrade its product range to reflect the changing needs of today's generations and tomorrow's world.

Commitment

All our employees share the company's determination to see children thrive, while fostering wellbeing for everyone and enhancing customer satisfaction.

Proximity

All around the world, local teams are ready to respond and bring a dedicated and professional approach to each playground and sports area project.

Learn more in our corporate video.

Our head office and manufacturing facility are based in Vouvray, France.

International presence

6 subsidiaries

55 countries

310 employees

+100 000 playgrounds and sports areas

Integrated expert knowledge

Our in-depth knowledge of children is the driving force behind every project

Every day, our teams are focused on leading projects that strengthen their expertise in children's developmental needs by:

- Working alongside childhood specialists.
- Gathering insights into the latest lifestyles and trends.
- Observing and analysing how children behave on their own, and as part of a group, within their educational play environment.
- Planning to ensure that play experiences promote the development of children's motor, sensory, cognitive, creative and social skills.

Design: inextricably interwoven into Proludic's DNA

Proludic's in-house Research & Development Department is a powerhouse for pioneering innovative ideas that comply with applicable standards.

Our designers are responsible for masterminding leading-edge concepts and product ranges geared towards the expectations of children and adults alike. We also have a long track record in developing bespoke and personalised projects.

- 6 designers and 15 technical engineers.

Integrated manufacturing processes

To better deliver superior efficiency, flexibility and quality, Proludic's manufacturing and distribution functions are based out of the company's head office.

- 60 qualified workers.
- Ability to work with a wide variety of materials, including wood, metal, rope, composites and plastics.
- Quality control and testing on materials and equipment.

Production processes are controlled and managed entirely within the company, meaning that Proludic can manufacture custom products and unique designs with greater responsiveness.

Landscape design

Your project is unique to us!

Each project starts with an initial meeting. This allows us to get to know you as a client and understand your needs, so we can provide a tailor-made design solution in keeping with your brief.

Our combined knowledge and expertise ensure your needs will be carefully assessed, and that we will provide you with advice to ensure consistency across your play area project in terms of products, location, layout and environment. Following this initial consultation, we are then able to create the most appropriate project design to achieve a harmonious and attractive end result.

- 200 salespeople are in the field every day, across the world.
- Landscape designers are at your service.

Installation & project management

ProLudic project manages each play space project from the time you place your order, through to project completion - and beyond.

Our services include:

- Installation of play and sports equipment
- Landscape integration
- General layout works
- Laying safety surfaces
- Aftersales service
- Servicing and maintenance

We carry out all our work in line with the project objectives and follow safety requirements.

Aftersales service

We are here to help, long after your project is installed. If there is anything you need, we will get back to you as quickly as possible.

Our promise to you?

90% of requests are processed within 24 hours

80% of spare parts are shipped within 5 working days

A proactive environmental policy

Operating as a professional organisation in the childhood development sector, Proludic's decision to spearhead initiatives aimed at protecting the environment and laying the foundations for future generations has always been an obvious choice.

Today, we are determined to step up our efforts in this area by reinforcing the company's environmental policy with **3** key **cornerstones** :

- ▶ Sustainability
- ▶ Fighting climate change
- ▶ Maintain a strong local presence

We are building new **indicators** to lead and enhance our proactive policy and accurately measure trends in its performance.

Proludic's environmental strategy

Commitment 1 Sustainability

We offer playgrounds, sports areas, equipment and solutions that are capable of standing the test of time and withstanding all weather conditions, however extreme! From the outset, our products have been engineered with sustainable materials that are guaranteed for their longevity (refer to Our Guarantees on page 296). Our products are also designed with reparability in mind to extend their life.

Indicators

9.12

15 years
16 years
17 years...

Reparability index

Proludic is staying one step ahead of the innovation curve by creating the first reparability index for playgrounds and sports areas. Therefore, each item of equipment manufactured by Proludic features an index to determine its reparability score. The average score is 9.12 out of 10.

Average playground service life

According to a global study conducted in 2022, 90% of the playgrounds that Proludic produced over 15 years ago are still 100% functional.

“ True to our values, we are taking tangible action to maximise the service life of our designs and reduce their environmental impact. We are striving to reduce global warming for future generations. ”

Commitment 2 Fighting climate change

We have analysed our activities to reduce our carbon emissions and we have prioritised action on the processes that generate the highest emissions. As such, we are focused on managing and taking action on the design, manufacturing and transportation activities for our playground and sports area equipment, as well as all our travel, to minimise their carbon footprint.

Indicators

Recycled and recyclable raw materials

From the start, Proludic's equipment is designed to incorporate a maximum amount of recycled and recyclable raw materials. 75% of Proludic's products contain recycled raw materials and 88% are recyclable.

Waste recycling

All our processes are designed with an emphasis on recycling waste. 93% of production waste is recycled.

Indicators

Preliminary assessment

To guarantee best-fit and long-lasting playgrounds, the details of each project are given every consideration, including the local inhabitants' needs, the site topography and the playground's seamless integration into the surrounding landscape. 93% of our playground and sports area projects are preceded by a preliminary on-site assessment.

Local suppliers

We make a point of sourcing our raw materials and services from local suppliers. 94% of our suppliers are European, and 72% are based in France where our factory is located.

Check out our environmental policy and indicators on our website:

Playgrounds: a shining example of inclusion

What is an inclusive play area?

Integrated play area

Inclusive play area designed by Proludic

An inclusive play area is a space featuring an accessible layout and a range of play equipment so that children can express themselves, play together and progress at their own pace and to the best of their abilities.

Our inclusive play areas offer products that have been designed to accommodate various disabilities, such as:

-  motor
-  visual
-  hearing
-  intellectual impairments, autism...

without ever creating any stigma in how they are used or perceived.

What are the key considerations when designing an inclusive play area?

- Use colours, shapes, textures and sounds to stimulate the senses and promote development.
- Provide equipment and spaces that allow children to withdraw for quiet periods.
- Prioritise low-level activities either inside or outside of the play equipment to encourage interaction.
- Improve access to equipment by the presence of a ramp, low floors and safe steps. Offer several easy-access entrances.
- Provide simple activities with gradual progression in levels of difficulty to stimulate children and enable success.
- Create access paths and use appropriate ground markings to facilitate easy movement around the play area.

Inclusive flagship products

Identify all our inclusive products in this catalogue with this pictogram:

Assessment level is in alignment with the Americans with Disabilities Act (ADA)

Inclusive Seesaw p 179

Inclusive All-Terrain Vehicle p 178

Diabolo with ramp

Are you planning to create an inclusive play area?

Ask for a copy of our «Inclusive play areas» catalogue, which illustrates our strong commitment to children with disabilities.

We have designed our catalogue while closely working alongside the Proludic Observatory experts and NovaChild, a network of universal design experts, healthcare professionals and associations for disabled children's associations committed to improving wellbeing for children through the power of innovation.

The catalogue features appropriate solutions in terms of products and designs to ensure that playgrounds can be enjoyed by everyone.

Grafic Games: unique graphic designs for truly original playgrounds

Original, innovative and audacious all at the same time, the Grafic Games decorative technique has been developed to personalise all our play structures. This technique allows a project to stand out from the crowd and brings real added value to your playground.

- Pro ludic's internal teams are experts in using this technique.
- The finish can be applied to all compact composite and lacquered plywood panels.
- The varnish finish improves the graphics' resistance to graffiti removers.
- The warranties are the same as for all HPL (High Pressure Laminate) compact composite and lacquered plywood panels (25 years).

*Any other ideas?
Our imagination has no limits!*

Bespoke projects, you dream it... we create it

At Proludic, the only thing that we like more than being part of your project dreams, is turning them into a reality!

Drawing strength from our expertise in design, engineering, manufacturing and installation, we combine creative flair and high standards to create unique and spectacular designs.

We relish the challenge of breaking with convention, starting with a blank canvas and breathing life into all our customers' ideas.

Our creations come to life in the most varied play environments with larger, taller, themed and completely personalised products.

Figurative expression of a familiar animal theme

Pájara

Canary Islands - Spain

This playground went for a spectacular look by creating highly figurative structures that strike a chord with the collective imagination, namely dinosaurs.

Featured in all shapes and sizes, these long-extinct but popular creatures bring extra magic to this playground in a city set against the backdrop of a seemingly lunar landscape.

Standing at 6.25 metres high, the large bespoke structure adjoins a Rainforest Tower, together forming the main attraction of this site, which truly takes children on a journey back in time.

Customised graphical design to inspire learning

Zoodyssée animal park

Villiers-en-Bois - France

The Zoodyssée animal park shines the spotlight on Europe's wildlife, while pursuing a set of educational and ecological aims.

This playground draws its inspiration from the scientific expeditions associated with the 'Canopy Raft' and encourages children to play at being botanists as they discover the Guyanese biodiversity.

The space features a central structure standing at seven metres high with an observatory offering 360-degree views and topped with an airship. Canoes and a platform transformed into a research laboratory for studying tropical plant and animal species add the finishing touches to the playground.

Discover the playgrounds at
the Zoodyssée animal park

*An architectural design
with poetic flair*

Vestertorv Square

Kolding - Denmark

This large structure engineered from Robinia wood resembles a cloud-inspired origami. Its natural colour and its interlocking repetitive geometric shapes produce a sleek architectural design.

Openings have been created in this three-dimensional space that follow the structure's lines, without ever overlapping, to guarantee a fascinating play of light and shadow.

This original structure is imbued with a sense of poetry and is guaranteed to fire the imagination in a city where nature's presence can be felt everywhere.

Harnessing and showcasing the local heritage

Friedrich Heinrich Colliery Park

Kamp-Lintfort – Germany

The playground has been installed at the city's former mining site, which has been turned into a museum paying tribute to the local industrial culture and the miners' work.

The play equipment is spread over three specific spaces allowing children to discover how the colliery extracted the coal while having fun in pretending to be the miners as they toiled underground. The large towers are replicas of the original buildings and shafts that can still be seen nearby.

MULTIPLAY EQUIPMENT

Diabolo & Diabolo Baby	20
Kanopé	40
Vivarea	64
Biibox	68
Ixo	72

Multiplay equipment is designed to make children move without them even realising!

For young children: the variety of play elements and how they're incorporated into the structures are designed to challenge their motor skills. At the same time, they encourage their curiosity and sense of discovery. For older children: there's an opportunity to put themselves to the test - to slide, climb, turn and cross - to go a little faster and take a few risks.

Multiplay equipment is all about getting children to be active. But it also has an important role in nurturing fun, joyful interactions between children by creating a place for a group of children to play together.

DIABOLO
MULTIPLAY EQUIPMENT

Diabolo is an essential component of any play area. With platforms ranging in height from 60cm to 177cm, and with many diverse play elements, the Diabolo range is suitable for children from 6 months to 12 years old.

The modular nature of this range allows for multiple combinations. These can be adapted to a specific age range, or used to encourage interaction between children with different capabilities due to age differences or abilities.

The classic 'must-have' play features are included on each structural element. Varied and complex on more elaborate combinations, these features offer children more opportunities to discover, be challenged and have fun.

Diabolo is available in two colour palettes: "Zingy" (yellow, orange and green) and "Pastel and Wood" (lagoon blue, apple green and oak).

DIABOLO BABY

MULTIPLAY EQUIPMENT

A range designed for toddlers

The Diabolo Baby range is dedicated to early childhood. The structures are designed to encourage early learning, guiding young children through a sequence of activities that stimulate their motor and fine-motor skills and support role-play and interaction with others.

All activities take place at ground level or a maximum height of 60cm. All play elements are varied, relevant, adaptable and modular.

Diabolo Baby, a range meeting the developmental and wellbeing needs of children from 6 months to 5 years:

Helping young children discover new motor skills

On all fours, children move forward in a confined space.

Moving forward on a slope, holding narrow shapes that are raised and spaced apart.

Moving in an area surrounded by empty space.

Going underneath.

Understanding obstacles

Developing their sensorimotor and psychomotor skills

Encouraging fine motor skills through the movement of shapes along a defined path.

Exploring how different objects look: colours, transparency, distorted reflections, light/dark contrasts.

Developing awareness of shapes (square, round, triangle)

Resolving play tasks using the manipulation of simple shapes that use thought, memory, learning and reasoning.

Experiencing different textures (raised diamond shapes, grass effect, rough surfaces).

Supporting their social development

Learning to play and interact with others.

Developing their imagination through role play

Encouraging children to help each other.

Climbing, sliding, crawling, sharing, inventing... GROWING!

MULTIPLAY EQUIPMENT

KANOPE
MULTIPLAY EQUIPMENT

The Kanopé range, with its structures resembling wild grasses or tree trunks bent by the wind, invites children to venture into nature.

Children from two years of age can navigate a pathway that's horizontal or vertical, steep or moving. They can climb in all directions, clambering up and down numerous uniquely-shaped rope structures. They can pretend to be acrobats or tightrope walkers, or they can slide down a rope, a traditional slide, or take the plunge using the Speed Slide.

All play features fit with Kanopé's signature design - inspired by nature, with a contemporary, streamlined look.

The range is available in two styles: evergreen and oak effect.

KANOPE

MULTIPLAY EQUIPMENT

Since its introduction, the Kanopé range has continually evolved, offering new and ever more innovative play features.

2017

The range provides a new aesthetic environment, inspired by nature in a contemporary way.

Kanopé, the adventure continues under the treetops

2018

Kanopé reaches for the sky with its majestic towers, aerial and luminous, of up to 8m high.

Kanopé, the adventure continues... higher, further... to other worlds

2021

Kanopé strengthens its range with new playful and inclusive structures designed for all age groups from the very young to older children: Ka'Yop Trees.

Kanopé, the adventure is played out inside, outside - everywhere

Proludic,
tell us the
story of
Ka'Yop!

Once upon a time...

In the Proludic Research & Development laboratory, our designers decided to create a new tree in the Kanopé family... Since Kanopé is in blossom all year round, they extracted a tiny seed, studied it, removed its outer shell, transformed it, enriched it, then decided to plant it...

A few months later, watered with reflection, consideration and consultation... enhanced through trials and tests... the tiny seed awoke from dormancy, germinated, emerged from the ground and grew into... Ka'Yop.

The different varieties of Ka'Yop trees:

Ka'Yop Essential,
Ka'Yop Dynamic,
Ka'Yop Inclusive,
Maxi Ka'Yop,
Ka'Yop Spiral

Discover the story in
video of how Ka'Yop
trees were created

KA'YOP

FULL OF SECRETS INSIDE, OUTSIDE - EVERYWHERE

Ka'Yop is an enchanted tree that will delight both children and teens with its wealth of exciting play activities.

The lower part contains collaborative and inclusive play elements. Play panels, sound-play, climbing nets, moving seats and rotating play features are spread over the 4 structures.

The upper part, with its lush green foliage, transforms the tree into a leafy cocoon, containing a wide variety of motor and sensory activities.

KANOPE - THE TALL TOWERS

MULTIPLAY EQUIPMENT

These majestic tall towers, as high as 8 metres, will make an impact in any environment.

Children can climb a rope staircase to reach asymmetric play houses perched high at the top of the towers - giving each child a commanding view and a special space above the action.

A large 'Kayak' spiral slide guarantees a thrilling ride all the way back down.

MULTIPLAY EQUIPMENT

VIVAREA
MULTIPLAY EQUIPMENT

The Vivarea range provides a variety of interesting and stimulating play activities for children aged 2 to 8 years, in a style that captures the sunny European climate.

The structures take their inspiration from Mediterranean villages nestled into the mountains, with varied levels, spaces, shapes and heights.

Semicircular terraces, narrow, straight walkways, clever variations in platform levels, closed or open playhouses; the equipment can be used by large numbers of children and it provides them with lots of activities to enhance learning and motor skills.

The equipment range comes in a variety of combinations, with key opportunities for play and development, providing suitable options for small or larger play areas alike.

BIIBOX
MULTIPLAY EQUIPMENT

Designed like a town, the play area provides a meeting point for children aged 2 to 12 years who want to test and develop their motor skills. This provides opportunities for children who are eager to find excitement, adventure and other children to talk to and socialise with.

The style of the Biibox range is contemporary, with a look that combines flowing curves utilising predominantly metal materials, highlighted by brightly coloured panels.

Its modular design allows a solution to be found for all requirements and enables it to fit effortlessly into the surrounding environment.

IX0
MULTIPLAY EQUIPMENT

The Ixo range speaks the language of pre-teens.

No longer satisfied with playing the same games as younger children, pre-teen want to be challenged - to test their strength, to prove themselves in the eyes of others, to make their own rules.

Inspired by modern architecture, the Ixo range is contemporary in style, with clean lines and transparent structures.

The range is available in two styles – choose from metal or wooden posts - to create a more urban or more natural effect.

THEMED EQUIPMENT

Adventure	84
Metropolis	98
City	106
Aquatica	120
Medieval	128

Our themed play equipment fires up the imagination. Children can dream of being adventurers on boats, trains, rockets and fire engines. They can imagine lions and dinosaurs. They can create their own world around our playspace themes: Adventure, Metropolis, City, Aquatica and Medieval.

They can express themselves freely, stimulated by the many details and unique elements on every piece of equipment.

ADVENTURE
THEMED EQUIPMENT

Our Adventure-themed equipment transports children into the leafy undergrowth of the jungle. Whether climbing aboard a jeep or carefully crossing the suspension bridge, young explorers can go in search of a secret temple and come face-to-face with wild animals along the way.

Each structure is equipped with a range of play elements that challenge and stimulate the senses.

The use of an orange, brown and green colour palette, emphasises the tropical forest theme.

ADVENTURE THEMED EQUIPMENT

METROPOLIS
THEMED EQUIPMENT

The Metropolis range welcomes children to a world that draws its inspiration from the books of science fiction writers such as Jules Verne and H.G. Wells. The play structures are weird and wonderful machines, each complete with unique design details and imaginative play features.

The combination of stainless steel posts and copper coloured play panels reinforce the futuristic look of the equipment.

CITY
THEMED EQUIPMENT

The City theme takes children on a journey to an imaginary urban environment where they take on the role of a fireman, ambulance driver, postman, train driver, or even a passenger on an open-top bus.

The products are packed full of play features that are ideal sources of inspiration for role-playing games, as well as for the development of fine motor skills.

AQUATICA
THEMED EQUIPMENT

To set sail across the stormy seas and be shipwrecked on a desert island. To drop anchor and go fishing with friends.

Children can create any number of adventures around our water-themed playgrounds. Each structure in the Aquatica range is equipped with numerous play elements designed to develop motor and fine motor skills, and stimulate the imagination.

MEDIEVAL
THEMED EQUIPMENT

The Medieval theme transports children to a world of knights, castles and chivalry.

Symbols from this period such as turrets, shields and bridges adorn the play equipment. When combined with children's imagination the equipment becomes the starting point for a host of fun adventures. The numerous play panels add to the theme and test children's problem-solving skills.

ORIGIN' ROBINIA WOOD EQUIPMENT

Multiplay equipment	136
Themed equipment	144
Traditional equipment	150
Trail equipment	156

The Origin' range of play equipment recreates the very essence of what nature has to offer: a treehouse, crossing a stream over stepping stones or an uprooted tree trunk, an adventure trail that includes climbing, sliding and discovering, an encounter with animals or birds, a walk along a forest trail or venturing downriver.

Here, children play in a setting inspired by nature. Their senses are awakened and stimulated by the look and feel of the Robinia wood with its naturally irregular forms and enjoyable sensation beneath the fingers.

The play equipment in the Origin' range is designed for children aged one and above.

ORIGIN' MULTIPLAY EQUIPMENT
ROBINIA WOOD EQUIPMENT

All children have the same dream of hiding away in a treehouse.

The multiplay structures in the Origin' range promise a number of original adventures in the heart of the natural countryside combining equipment with basic play features that will bring children together, including triangular towers with different platform heights, ladders, climbing ramps, fixed or moving bridges, tunnels, vertical nets, climbing walls, slides and sliding poles.

The highest combinations on offer stand over five metres tall and are adorned with unusual features, such as a stork's nest, the trees around the clearing and dilapidated cabins.

Splashes of colour truly bring out the originality of this range. The larch fence panels and playhouse walls are finished in shades of green to give an extra touch of natural harmony with the surrounding environment.

ORIGIN' THEMED EQUIPMENT
ROBINIA WOOD EQUIPMENT

Children love escaping to an imaginary world where anything can happen. Whether on land, at sea or in the air, they pretend to be explorers, seafarers, merchants or aviators. They produce and act out fantasy stories with plenty of twists and turns that epitomise their creativity.

The structures with their imaginative shapes offer a wealth of details for enhancing the play experience.

Some provide traditional and must-have activities, while others contain countless accessories or play with perspective, such as optical illusions.

ORIGIN' TRADITIONAL EQUIPMENT
ROBINIA WOOD EQUIPMENT

Swings, springers and roundabouts are firm favourites among children of all ages. They can be installed near each other or added to a play space built around a multiplay structure.

Comprising Robinia wood boards, posts and beams, Origin' structures embrace the shape of the wood, which gives the playground a highly intensified natural look.

ORIGIN' TRAIL EQUIPMENT
ROBINIA WOOD EQUIPMENT

The Origin' trail equipment offers different levels of difficulty. The most accessible items include stepping stones, beams and low gangways, which help children to work on their sense of balance and overcome their fear of heights.

The equipment gradually becomes narrower, higher and more challenging. Children can gain a foothold on the rounded beams, moving gangways and flexible ropes. Various techniques are used to cross the different items of play equipment. Those techniques gradually scale in complexity with the aim of helping children coordinate their movements and control their body in suspended space.

Finally, they can improve their technique, strength and self-control on the climbing equipment or structures where they need to use their arm strength to get from one side to the next.

ORIGIN' ROBINIA WOOD EQUIPMENT

MOVING EQUIPMENT

- Springers 168
- Rotating equipment 182
- Cableways 190

Popular with younger and older children alike, moving play equipment provides a key focus of activity, offering a wide variety of sensations: swinging and balancing, rocking and gliding, moving through space, fast and slow.

Children will love the dynamic experience of our cableways, spring motion and rotating equipment.

SPRINGERS
MOVING EQUIPMENT

Springers are an essential element of any play space for young children. They enhance a toddler's sense of balance and help them coordinate their movements, while giving older children great fun as they swing away wildly.

Springers are equipped with suitably-sized footrests and handles, so they're ergonomically designed for maximum user comfort and safety. Their playful and colourful shapes are based on familiar themes, designed to stimulate a child's imagination.

ROTATING EQUIPMENT

MOVING EQUIPMENT

Children of all ages love rotating equipment.

Younger children gradually learn to enjoy the exhilaration of speed on roundabouts. As children get older and more self-assured, they can test their balance and push their limits on more challenging dynamic structures that combine rotation and swinging.

CABLEWAYS
MOVING EQUIPMENT

Cableways offer an essential, fun aspect to active play areas for pre-teens and teenagers. Not only will they enjoy the thrill of gliding through space, cableways are also a great way to teach children of all ages to cooperate, take turns and share.

Young people can both challenge themselves and compete with others. They can develop their own technique and build strength and agility while they play.

TRADITIONAL PLAY EQUIPMENT

Playhouses	198
Swings	204
Slides	218

No playground would be complete without certain classic play items like playhouses, swings and slides. This equipment offers great places for children to play alone or with others. Other play elements offer heightened sensations that go with sliding and swinging.

Whether used as standalone items or to compliment multiplay structures, they're fundamental to any play area design.

PLAYHOUSES
TRADITIONAL PLAY EQUIPMENT

The playhouses provide wonderful places for young children to play or socialise.

Their shapes, style and cleverly designed accessories take young children into an imaginary world where they can pretend be shopkeeper, teachers or chefs...

SWINGS
TRADITIONAL PLAY EQUIPMENT

Swings are a traditional play item and an all-time favourite that has given many generations of children the sensation of flying through the air and the joy of seemingly touching the sky! Although the sheer pleasure that comes from swinging remains unchanged, swings are now available in all shapes and sizes.

Wraparound seats or braided rope seats just 40 cm above the ground guarantee safety for the youngest users. Older children can have fun together on the 1.20 metre diameter pod swing or the braided balancing rope. The hexagonal swing with its six sets of seats offers children an even greater set of challenges.

5

2

4

6

1 Swing chains. Galvanised steel overmoulded with rubber. (pod swing)

3 Rotation system fitted with bearings.

5 PVC sliding rings prevent wear on the metal parts. (pod swing)

2 The **rotation system** enables swinging in both directions. A safety chain strengthens the pod support. (pod swing)

4 Anti-wrap round rotation system. Made of polyamide parts and stainless steel fixings.

6  The **inclusive deck-chair seat** features a stainless steel frame and a rubber seat pad. The swing chains are made of stainless steel.

TRADITIONAL PLAY EQUIPMENT

SLIDES
TRADITIONAL PLAY EQUIPMENT

Forever popular, slides are an integral element of a child's world.

For younger children, there are wider steps that provide a stable base for safe access, while older children climb up a ladder.

Straight or wavy slides, stainless steel tubular structures, polyethylene Kayak slides – the variety of shapes, lengths and materials provide multiple solutions for developing a play area and adapting it to any type of environment.

CLIMBING & BALANCING EQUIPMENT

Trails	226
Trampolines	234
Rope structures	236
Climbing structures	244

Balancing and climbing equipment encourages children to test their agility, spatial confidence and motor coordination.

ACTiNinja obstacle courses, urban parkour-inspired modules, pyramids, trampolines, climbing walls... the wide variety of equipment present different levels of difficulty appropriate to the children's age and abilities.

TRAILS

CLIMBING & BALANCING EQUIPMENT

Trails promote sequenced movements and positions that will help children develop their motor skills. Crossing a beam or vertical ramp, moving forward across unstable steps or sloping features, climbing, crawling, hanging... children learn how to control their body in the air, coordinate their movements more effectively and develop their concentration.

Trails offer varying levels of difficulty, prompting children to take risks and push themselves beyond their limits. They also encourage children to play together in groups as they try to see who can complete the course in the fastest time.

TRAMPOLINES

CLIMBING & BALANCING EQUIPMENT

Trampolines give children wings and are the ultimate in fun!

Trampolines are simple to use and available to children aged 3 and above. They develop motor skills, coordination, balance and muscle strength. In the air, children become aware of how their body feels in the air and improve their posture.

Trampolines rightly belong in any inclusive play area. Ground-level trampolines are protected by a frame with rounded edges and ensure easy access to the centre for children in wheelchairs with a helping hand from a carer or friend, so that they too can gently experience the sensation of bouncing.

The steady bouncing motion of the trampoline can have a calming effect on over-stimulated and autistic children.

ROPE STRUCTURES

CLIMBING & BALANCING EQUIPMENT

Designed in 3D, rope structures allow children to take complete ownership of the space, making use of both the peripheral and inside sections of the equipment. Crossing requires concentration and good hand-foot coordination to best manage the instability of the ropes and, in some cases, the suspended stepping stones at the centre of the structures.

By going higher, children expand their perception of space. Although the same climbing techniques are used from start to finish, the most valuable lesson for children will be overcoming their fear of heights.

Rope structures can be connected to other types of play equipment, such as slides and climbing walls, or incorporate aerial trails to move from one module to the next without putting a foot on the ground.

CLIMBING STRUCTURES

CLIMBING & BALANCING EQUIPMENT

Climbing structures attract children and teens who love climbing and playing at height.

Nets, climbing walls, ladders, horizontal bars, a 4 metre-high pole... the equipment is varied and presents different levels of difficulty and technique appropriate to the age of the users. Users are required to move across horizontal, vertical and sloping surfaces, which calls for balance, agility and coordination.

These structures also encourage children to play together. They can compare their skills, throw down the gauntlet or help each other overcome a difficulty and progress along the structure. The enjoyment of playing comes top of the list, which promotes interaction and socialisation.

CLIMBING & BALANCING EQUIPMENT

EDUCATIONAL & SENSORY EQUIPMENT

GymLudic® trail & Balancing modules	254
Play panels, Audio & Musical play	258
Sand play, water play and gardening	266
Interactive play	272

Educational and sensory play helps children grow and improve their abilities by nurturing their cognitive, creative and social skills.

Trails hone their motor skills and encourage them to take risks. Play panels develop concentration and observation through play. Playing with sand, water and soil stimulates the senses, increases motor skills and inspires creativity in the youngest children. Musical play activities help activate children's hearing. Interactive play activities arouse keen observation, movement skills and quick response.

All these play elements encourage children to socialise through play.

GYMLUDIC® TRAIL & BALANCING MODULES
EDUCATIONAL & SENSORY EQUIPMENT

The GymLudic® trail and the balancing modules are ideally suited to educational programmes aimed at scaling up skills development and learning in young children through a series of actions requiring increasingly complex and coordinated motor skills. They encourage children to enrich and improve a wide range of abilities, including locomotor skills, balance and coordination, and how to conquer their fears.

GymLudic® is an educational play structure featuring up to 80 activities for stimulating children's motor skills.

This system is supplied as a compact, folding box and provides a number of exercise opportunities involving balancing, jumping, crossing, throwing and space management. Activities are concentrated in and around the box. They can be sequenced to form a trail or performed individually depending on the required learning objectives.

Thanks to its modular design and various accessories, teachers can provide scalable exercises with different levels of difficulty. Children can therefore enhance their motor and psychomotor skills over time.

The shape and complexity of the different balancing modules allow for a wide variety of crossing activities.

GYMLUDIC® TRAIL & BALANCING MODULES

EDUCATIONAL & SENSORY EQUIPMENT

GYMLUDIC®

Compliant with the requirements of pre-school teaching programmes, GymLudic® is an educational play structure that comes as a compact, easy-to-handle folding box. It can be installed either indoors or outdoors depending on the season.

PLAY PANELS, AUDIO & MUSICAL PLAY
EDUCATIONAL & SENSORY EQUIPMENT

Engaging and fun, children enjoy using interactive play panels like Sensory Flowers and Tubophones.

Understanding play activity instructions on the panels help develop their observation and analysis skills. Performing the activities demands concentration and thought. It helps develop hand-eye coordination and strengthens their ability to plan.

Musical play activities stimulate their auditory perception and helps develop creativity and encourage interaction with other children.

SAND PLAY, WATER PLAY AND GARDENING EDUCATIONAL & SENSORY EQUIPMENT

The handling of water, sand and soil is a great source of sensory experiences. Children enjoy themselves working with these materials whose properties allow a multitude of experiments. They refine control and coordination of hand movements.

They gain awareness of the concepts of shape, state, weight, volume... and learn to understand cause and effect relationships.

Gardening activities also help them understand how they can interact with nature and understand the notion of life growing. In addition, gardening can also help develop children's sense of smell.

INTERACTIVE PLAY

EDUCATIONAL & SENSORY EQUIPMENT

Interactive play experiences combine physical and intellectual activities and technology. Designed for a connected generation, these play activities interweave sound, light and action. Visual and audio stimuli call upon juniors' cognitive functions, requiring them to use memory, recognition, speed and responsiveness.

Group challenges also help develop team spirit, cooperation and cohesion in children.

EXPLANATORY VIDEOS

► Multi-use games areas

Compact structures accommodating several activities in one location, including football, basketball, handball, volleyball and hockey...

- Modular, inclusive, durable and safe
- Areas where teens can socialise and have fun
- 24 options available

► Metal trim trail / Wooden trim trail

A succession of muscle-building, cardio and stretching exercises that can be sequenced together to create a complete and scalable workout

- For those who regularly exercise or simply enjoy walks
- Available in two heights to create trails suited to younger users or adults
- 39 options available

► Dynamic Structures

Equipment designed around extreme sports for thrill-seeking teens

- Rich sports content: heights, speed, slack-lining and rotation
- 8 options available

► Football, table tennis, basketball

Individual items of equipment for creating an additional focal point in a sports area

- All users
- 6 options available

► Off-road cycling trails

Modules that can be combined to create circular or straight-line circuits depending on the terrain

- For casual cyclists or competition riders, whether solo or in groups
- 8 options available

FURNITURE & SIGNAGE

Furniture 282
Signage 286

Leisure spaces are places to relax for all age groups, users and accompanying adults, and successful design is achieved through the harmony created between play equipment, furniture and the environment.

Designing a play area, therefore, involves much more thought than just play aspects. Allowing children the freedom to play in a clean, hazard-free location protected from paths and roads is paramount. However, providing parents, carers and users the ability to rest, have a snack and chat also contribute to a successful leisure space.

Classic or contemporary in design, we have furniture suitable for every project setting, which will blend into any environment seamlessly.

Our signs are practical, aesthetic and fun, providing useful information for play area users. Text can vary depending on where the signs are installed.

TECHNICAL SERVICES

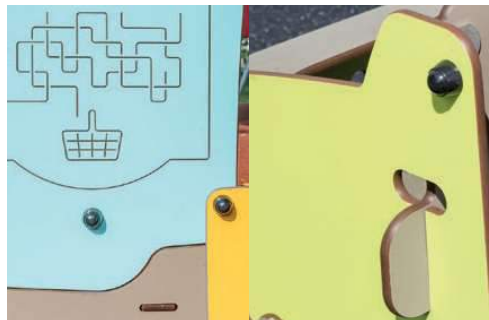

Choice of materials 289

Index 294

Our guarantees 296

Compact composite

Our compact composite panels are 13mm thick, and they are made up of softwood fibre (70%) and phenolic binder (30%). They show high levels of dimensional stability over long periods.

The material is unaffected by exposure to major temperature variations, guaranteeing the durability and solidity of the assembled elements. It is a versatile material that is not affected by contact with damp or abrasion.

The coloured surfaces are obtained using pigmented resins that provide good levels of resistance to ultraviolet radiation and aggressive cleaning products.

A range of colours has been specially developed by Proludic, enabling the company to highlight the originality of the equipment and its play aspects.

The platforms are made from a textured and non-slip compact material (HPL), 12,5mm thick.

Plywood

Plywood is made from thin sheets of wood that are bonded together, crossing the layers to counteract the wood's natural movements and produce a **rigid and durable product**.

Birch is used for our 21mm plywood panels due to the quality and strength it provides.

Plywood is stable against moisture and therefore ideal for outdoor use in varied climates.

The colours enhance the aesthetic appeal and are applied by electrostatic spraying of two-component polyurethane lacquer that is free of heavy metals. It is **resistant to potentially aggressive chemicals such as anti-graffiti cleaning products**. The polyurethane lacquer also protects the plywood **from damage by ultraviolet radiation**.

Robinia

Robinia is a broad-leaved species renowned for **its natural longevity and resistance** to external attacks (insects, fungi, inclement weather, etc.) without any fungicide or insecticide treatment.

This wood has been adopted by the construction industry for **its natural resistance to rot** and is perfectly suited to use as posts offering heavy load-bearing capabilities. After removing the bark, the trunks are used as is without any machining or treatment.

Splinter-free and never too hot, even after prolonged exposure to the sun, **Robinia guarantees maximum safety**.

Since Robinia is a living material, natural phenomena (greying due to UV light, cracks, etc.) can appear over time, which may alter the initial appearance of the product but without any impact on its intrinsic structural quality.

Laminated wood

Laminated wood is made up of layers of solid wood (often Fir or Scots pine) glued together. **It is a very strong material and ideal for posts that have to carry larger loads.**

Its qualities of resistance to dampness and pollution **reduce the maintenance costs of the structures and ensure their durability**.

Durability is further enhanced thanks to:

- Autoclave treatment of the laminated wood that provides in-depth protection from fungi, insects and termites.
- A surface coating that makes the wood waterproof and protects it from UV radiation.

The timber is free of defects (knots or splits) because they are identified and removed during the cutting work on the laminated strips. It is also **free of splinters**, which eliminates the risk of injury and is pleasant to touch.

Our galvanised steel and painted galvanised steel posts

Our metal posts are made of 2.5mm thick galvanised steel to ensure the requirements for **robustness and safety of play structures are achieved**.

The posts provide a **guarantee of longevity** under widely varying climatic conditions thanks to the steel galvanisation process. The application of a **polyester powder coating that is resistant to UV radiation and temperature variations provides further protection**.

Proludic has developed its own unique galvanised steel posts. Their round shape and fluted aspect form an effective anti-graffiti surface. The two-toned grain finish reduces the appearance of scratches and ensures the aesthetic integrity of the posts.

Our stainless steel tubes

Stainless steel is a material with **high mechanical strength**.

Our stainless steel tubes stand up to graffiti, bad weather and urban pollution; **they require very little maintenance and are also resistant to even the most aggressive solvents**.

Our painted aluminium panels

Aluminium is **durable and strong**, making it suitable for many applications. The natural formation of a surface oxide layer enhances its **resistance to corrosion**.

Application on aluminium of a **coat of polyester epoxy paint** provides high levels of resistance to UV radiation and temperature variations, **ensuring long equipment life in diverse environments**.

Our plastic parts

Proludic selects the various types of plastic based on their properties and intended purpose.

Our plastic parts are non-toxic and resistant to wear, impact, climatic variations and many chemicals. They ensure durability and long life of our play equipment.

All our plastic parts are marked with standard international abbreviations, which ensure their **traceability** and **recycling credentials**.

Our ropes

Our ropes are made of corrosion-resistant galvanised steel wire cable strands covered with polyester. **The multi-stranded wire cables remain flexible whilst resisting distortion and withstand heavy loads.**

The strong and durable polyester covering ensures **user comfort and protection.**

Our fixings

Our fixings are made of stainless steel to **ensure the excellent robustness of our assemblies and resistance to wear, corrosion and climatic variations.**

All fixing components are protected by anti-vandal polyamide caps.

OUR MECHANICAL SYSTEMS

Our experience has shown that our products are subjected to extreme stress.

This has led us to develop specific parts to guarantee an optimum level of comfort, durability and strength.

HERE ARE SOME EXAMPLES:

The in-house systems we have developed ensure the reliability of our products while preventing wear, distortion and breakage of mechanical parts.

Springers

The support bracket is an exclusive part patented by Proludic. Made from filled polyamide, it provides exceptional resistance, safety and durability to the system whilst being aesthetically pleasing.

Swings

The seat mounting brackets are designed to withstand heavy loads. They are made from stainless steel wire and are gently rounded in shape to ensure user safety.

PVC sliding rings limit wear to metal parts caused by swinging movements over time, and extend the product life.

Rotation systems

The components used in our rotation systems are selected for their mechanical qualities and guarantee the reliability and robustness of the equipment.

Encased or inserted into connecting parts, our rotation systems are both waterproof and aesthetic.

Guarantees

25, 10, 5 and 2 years

Proludic is committed to the quality and durability of its products.

In addition to using carefully selected materials and applying the highest manufacturing standards, Proludic provides extensive guarantees.

Our guarantees:

25 years for any structural failure of sport or play products due to a material or manufacturing failure of:

- Panels (lacquered plywood / coloured compact / polyethylene)
- Posts and supporting structures (painted galvanised steel, galvanised steel, stainless steel)
- Stainless steel tubes

Key Terms and Conditions

Correct at the time of printing. Our full terms and conditions are available on request and are subject to change at any time.

Formation of a Contract

The quotation given on or attached to these terms and conditions will remain valid for a period of 90 days, unless otherwise stated on the quote. Acknowledgment and acceptance of this proposal is made by you placing an order within the specified period above, at which time you will be bound by these terms and conditions. Each proposal accepted shall constitute an individual legally binding contract between you and us. Such contract is hereinafter referred to in these terms and conditions as «an order».

Nothing in these terms and conditions shall prejudice any condition or warranty expressed or implied, or any legal remedy to which we may be entitled in relation to the goods / and or the work the subject of this order.

Our Responsibility

We will ensure that all materials supplied comply with safe building practices and are free from defects and that any work carried out is carried out with reasonable care and skill and to a reasonable standard. Before starting any work we will carry out an inspection to make sure that all work quoted is appropriate and practicable.

If after our inspection any further work is necessary either because of alterations in design, specification or otherwise and this causes an increase in costs we will send you a further proposal giving details of the extra costs and will only proceed with the works once your written acceptance has been received.

Subject to our terms we will carry out the work in accordance with our proposal.

We will make good any damage caused whilst carrying out the work.

Your Responsibility

You will permit us during normal working hours to carry out an inspection and thereafter to undertake the works according to the programme set out in the proposal.

You will remove all items necessary to allow us to commence the works and cover and protect all fixtures and fittings, (which cannot be removed. You will obtain all permissions and consents, (including if necessary planning permission) from landlords, local authorities and others, which are required before the work can commence.

Where you are required to provide us with measurements or other information such measurements or information must be correct. If we rely on the measurements or information given when preparing our proposal and such measurements or information are incorrect we reserve the right to increase the price to make good any errors or additional works required as a result.

Payment

Goods are invoiced upon dispatch. Payment terms are strictly net 30 days from the date of invoice. Acceptance of this order constitutes agreement of these terms and overrides any other payment terms, including any quoted on your purchase order. We reserve the right to issue interim invoices or applications for payment, or request payment prior delivery or installation on a proforma basis.

Please note all prices quoted are excluding VAT.

Delivery/Installation Dates

UK delivery is priced at 10% (with a minimum £100 charge) based on the total list price value of the equipment. We reserve the right to increase the delivery charge dependent on location of delivery address, all amended prices will be notified on quotations.

You will be provided with an estimated delivery date on receipt of order and updated throughout the order process. Delivery is approximately 6-8 weeks from the date of order. Deliveries that cannot be accepted by the customer within 2 weeks of the agreed date, will be subject to a storage charge of £100 per week or 1% of the equipment value, whichever is greater.

Minimum Installation Charge

On orders received with installation, a minimum installation charge per site of £1000 applies in all cases.

Budget costs assume that easy lorry access & precise siting of the equipment will be provided, no surface or underground obstructions will be encountered during excavation such as concrete, hard-core, rock, chalk, roots, drainage, gas or water pipes, telephone or electricity cables etc. In the event of any such obstructions we reserve the right to charge for any additional work involved. We cannot accept liability for any consequent charges that may be incurred by disruption of any of the foregoing services. For fixed installation prices, a site survey is required by a company representative prior to the order being placed.

Main Contractor's Discount

Our quotation does not include for a Main Contractor's Discount. If a 2.5% Main Contractor's Discount is applicable, please add 2.563% to our quoted prices.

Cancellation Policy

The company reserves the right to levy a cancellation charge of:

- 25% of the total order value if cancelled more than 10 weeks from the scheduled delivery / start date.

-50% of the total order value if cancelled less than 10 weeks from the scheduled delivery / start date

Please Note: Any such charge is non-negotiable and is solely at the discretion of the Company. All drawings, descriptive and forwarding specifications, particulars of weights and dimensions are approximate only and not binding and illustrations contained in catalogues, price lists, sales literature and other advertisement material are for the purpose of general description only and none of these shall form part of this Contract.
