

PROJECT NAME: WOOLWICH POLYTECHNIC SCHOOL

CONTRACTOR: KIER CONSTRUCTION

ARCHITECT: FABRIK

LANGLEY DESIGN
EXTERNAL FURNITURE SOLUTIONS

Woolwich Polytechnic School for Girls is a brand new school situated in Thamesmead in South East London and provides state-of-the-art education facilities for up to 1,200 pupils. Langley Design worked with Kier Construction and ADP Architecture on their requirement for cycle parking allowing the students to store their bicycles securely and to protect them from the elements. We provided a number of our Malford Steel Cycle Shelters (MCS204) with a galvanised finish to provide a hard wearing & long lasting solution for the school. These durable shelters are a popular choice as they offer great value by covering two runs of cycle hoops (our Malford MCR201-5) under one roof, saving on both space and money ensuring you can achieve your required storage provision within your budget. Our steel shelters are available in a galvanised only or galvanised & powder coated finish and can be tailored to a project specific colour scheme in order to provide uniformity across the site. We also provided a number of bollards and door barriers to round out the street furniture requirement on the project. Available with installation or as supply only Langley Design offer a full range of Street Furniture products across the UK to a variety of customers and to a range of sectors.
