Morgan Sindall, with which we have a long-standing relationship with, approached us to work with them again on this £14.2 million expansion of Tufnell Park Primary School in Islington. The extension provided double the capacity of the already well-established school, allowing children from the immediate and surrounding areas to get the education they deserve.

We pride ourselves on being solution providers for all Street Furniture aspects, and for the new extension we combined our Sheldon Cycle Shelter (SCS310) with our Sheldon Buggy Shelter (SPG316), manufactured in Class 4 Treated Redwood, to create a single complete unit that catered to all the requirements of the new Primary School. The use of a durable treated and sustainable timber ensured the unit integrated perfectly with the other landscapes and when teamed with our benches (SBN311 and SBN322) made sure the whole site tied in together. Langley Design with 25 years of experience in the Street Furniture market offer practical and long-lasting solutions to ensure you can complete your projects on time and on budget, if you have a requirement for a current or future project please get in touch.
