

Harmony Hop

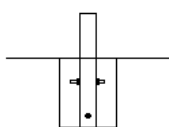

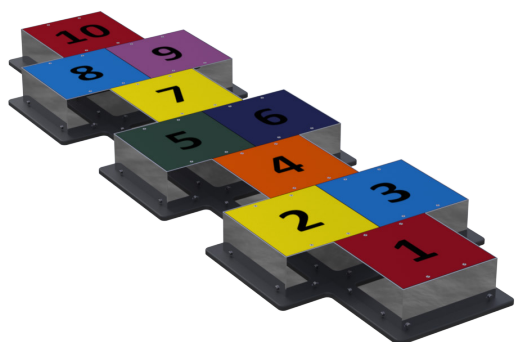

Description

Harmony Hop is designed to make music theory approachable and enjoyable for learners of all ages. Each hopscotch square represents a musical note: C, D, E, F, G, A, and B. By hopping from one note to another, players can easily learn the fundamental concept of musical harmony. They'll understand how these notes relate to each other in a melodic sequence, fostering a solid foundation in music theory.

The act of hopping and moving across the HarmonyHop also provides an exciting physical challenge. It helps children develop essential gross motor skills such as balance, coordination, and strength. As they hop from one musical note to the next, they enhance their physical abilities and promote a healthier, active lifestyle. Laid flush with the surrounding ground, the durable and slip-resistant surface is wheelchair-accessible, making it perfect for inclusive playgrounds.

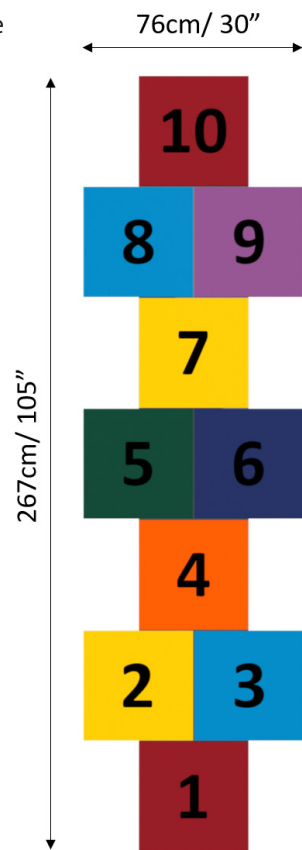

Materials and Features

- Stainless steel housing and sub frame.
- Stainless steel fixings and internal mechanism.
- Aluminum stepping plate.
- Aluminum internal chimes.

Tuning and Sound Level Data

C Major Diatonic Scale
Comprising 3 x Triads:
C Major
D Minor
E Minor
