

Greenfix Geocoir™ 900 Erosion Control Mesh

Application and Benefits

Greenfix Geocoir™ 900 erosion control netting is manufactured from 100% high quality coir fibre twine. Geocoir provides a strong and durable short to mid-term protection with an anticipated lifespan of over 5 years. Rolls are supplied in 2.0m x 20m folded and compressed rolls which are packed into bales of four. Geocoir can be supplied in individual rolls or full bales.

Benefits:

- Geocoir provides surface stability to steep and aggressive applications, such as watercourses and areas with high wind exposure.
- Geocoir slows water runoff and provides excellent silt collection which aids natural vegetation and long-term embankment regeneration.
- The rolls are simple and easy to install.
- The mesh matrix allows for easy planting.

Product Characteristics

Properties	
Fibre Content	100% Coir
Blanket Weight	900g/m ²
Functional Longevity	~ 5 Years
Width	2.0m
Length	20m
Presentation	Folded Compressed Rolls
Mesh Size	~ 12mm x 12mm
Ends per 10cm	6
Picks per 10cm	8
Thread Tensile Strength-Warp	~ 39kN/m
Extension	~ 20%
Open Area	~40%
