

## Greenfix Coir Rolls - Pre-planted

### Application and Benefits

Greenfix Coir Rolls are manufactured from 100% biodegradable virgin Coir fibres with a Polypropylene netting. The 3mm PP netting is UV stabilised and manufactured in a diamond mesh with 50 x 50mm apertures. Coir Rolls provide immediate soft edge erosion control to riverbanks, streams, canals, lake edges and ponds. The rolls are planted with native flora and fauna to help establish wild-life habitats and help to improve site biodiversity.

### Product Characteristics

Properties	Coir Rolls
Fibre	Coir
Fibre Content	100%
Mesh Netting Type	Polypropylene
Mesh Size	50mm x 50mm
Size	3m long x 300mm / 3m long x 200m
Weight	Approx 55kg wet / 27kg dry
Planting	Supplied planted with UK Native Species
Functional Longevity	2-3 Years
