

Greenfix Park Pave 38GL - High Strength Plastic Paver

Application and Benefits

Greenfix Park Pave 38GL is a 100% recycled plastic paving system ideal for filling with rootzone and seed for grass finished or decorative gravels for a more aesthetic alternative to the traditional hard paving systems such as tarmac, concrete and block paving. Park Pave 38GL is supplied complete with integral spikes on the bottom of panels, eliminating the requirement for additional nails.

Typical Applications Include:

- Car Parks
- Fire / Emergency access roads
- Helipads
- Cart paths / footpaths
- Bridleways
- Verge reinforcement
- Wheelchair access
- Porous paving

Integral Spike

Product Characteristics

Product Specification	Value
Loading (filled)	+ 400t/m ²
Loading (unfilled)	+/- 135t/m ² (PTV 828)
Dimensions	1200mm x 800mm
Height	38mm
Honeycomb Diameter	60mm
Open Space	>90%
Material	100% Recycled High Density Polyethylene
UV	UV Stabiliser
Weight per unit	+/- 2.85kg
Weight per m ²	+/- 2.97kg
Colour	Green
Copro	674/28
Biological Resistance	Very High
Chemical Resistance	Very High
Connection System	Integrated Connection System
Anchoring Pins	20mm
Marker Cap	Available
