

Greenfix Park Pave Gravel - Gravel Stabilisation System

Application and Benefits

Park Pave Gravel is a 100% recycled plastic paving system which comes with a non-woven geotextile bonded to the base for quick and easy installation. Each unit is 1200mm x 800mm x 30mm deep and is ideal for infilling with 6mm decorative gravels for applications including:

- Lightly trafficked car parks
- Footpaths / bridleways
- Cart paths
- Wheelchair access
- Private driveways

The system is extremely quick and easy to install as each unit simply snap locks into the adjacent units. Park Pave Gravel is available in white and black to blend in with or contrast with the gravel infill.

Product Characteristics

Honeycomb Structure	Value
Loading (filled)	400 t/m ²
Loading (unfilled)	130 t/m ²
Dimensions	1200mm x 800mm
Height	30mm
Honeycomb Diameter	42mm
Material	100% Recycled Polypropylene
UV	UV Stabiliser
Weight Per Unit	+/- 1.53kg
Colour	Black / White
Biological Resistance	Very High
Chemical Resistance	Very High
Marker Cap	Available
Geotextile	Value
Material	Polypropylene
Colour	White
Weight	90g/m ²
Production Method	Non-woven, mechanically bounded
O ₉₀ Value	70µm
