

Installation Instructions

Ground Fixed

Akadinda
Page 1 of 2

1. Assemble Akadinda frame comprising 2x 'X'-shaped legs and 1x horizontal beam. (See **Assembly Guide**). Cover 8 holes on horizontal beam using **4x30mm caps** (1.1)

2. Locate M8x80mm eye bolts through pre drilled holes using flat washers on both sides of the timber to prevent the fixing pulling into the timber. Secure in place with **M8 nyloc nuts**, cover 4 holes in ends using **4x30mm caps**. (1.3)

3. Place Akadinda in desired location and mark 4 holes for excavation.

4. Excavate holes to min depth **150mm** according to required height for intended players. Hole depth guide below.

5. Locate legs in holes and check levels prior to concreting in place. Once happy with location and levels, **fill holes using rapid hardening concrete**. Leave to dry according to manufactures guidelines.

Install Instrument with 1.5m free space (from widest point) around it.
