

Bespoke Planters - Glasshouse Street, London

Bespoke bronze lighting brackets - Peninsula Hotel, London

Established to provide bespoke design, engineering, manufacturing and installation services, Urban SF operates from a design consultancy with a manufacturing facility of over 6000 square feet. We provide concept design services through to fully installed product, professionally project managed with the requirements of our clients and excellent customer service at the heart of everything we do.

Bespoke seating & table, Coventry

Commonwealth Games bespoke bench, Birmingham

Design

Our team of highly experienced design engineers, project managers and procurement personnel have many years of experience delivering bespoke products for the urban realm on prestigious high profile projects for architects, local authorities and urban developers.

Bespoke seating - Coventry

Installation

Our qualified installation team, who have over 40 years of experience, can deliver and install any product we manufacture.

Installations are always supported with fully detailed risk assessments and method statements and are carried out with meticulous attention to detail. We do not leave site until our clients are happy with the installation.

Bespoke planters - Middlesex University

Manufacture

All components for our products are crafted by our skilled engineers or by trusted and reliable local manufacturers.

Our products are assembled in-house by our dedicated team to ensure that we fully meet client expectations and maintain the highest standards of quality in every product we produce.

Sustainability

Urban SF are proud to design and manufacture its products considering all aspects of sustainability. We believe the most sustainable way to use materials and resources is to keep them in use for as long as possible. We provide high-quality long-lasting solutions that will last in outdoor and public environments for decades, not months or a single season. Our products are always

engineered with ease of maintenance and replaceability of individual parts in mind. We have extensive experience of sourcing and working with fully recycled and high recycled content materials. Urban SF strives to make sure all the timber we use is from sustainably managed forests and we can provide FSC and PEFC documentation where requested.
