

Inclusive Trampoline MT-TRMPW 1.5 x 2.0

Our Inclusive Trampoline is for suitable wheelchairs to go on with an easy access ramp on both sides. The mat is reinforced with extra springs for durability. An accompanying person can stand on the trampoline with the wheelchair.

The product is weather-resistant and is also available with stainless steel handrails.

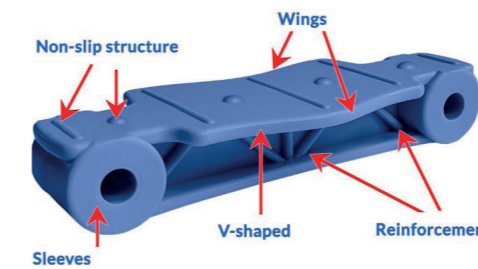

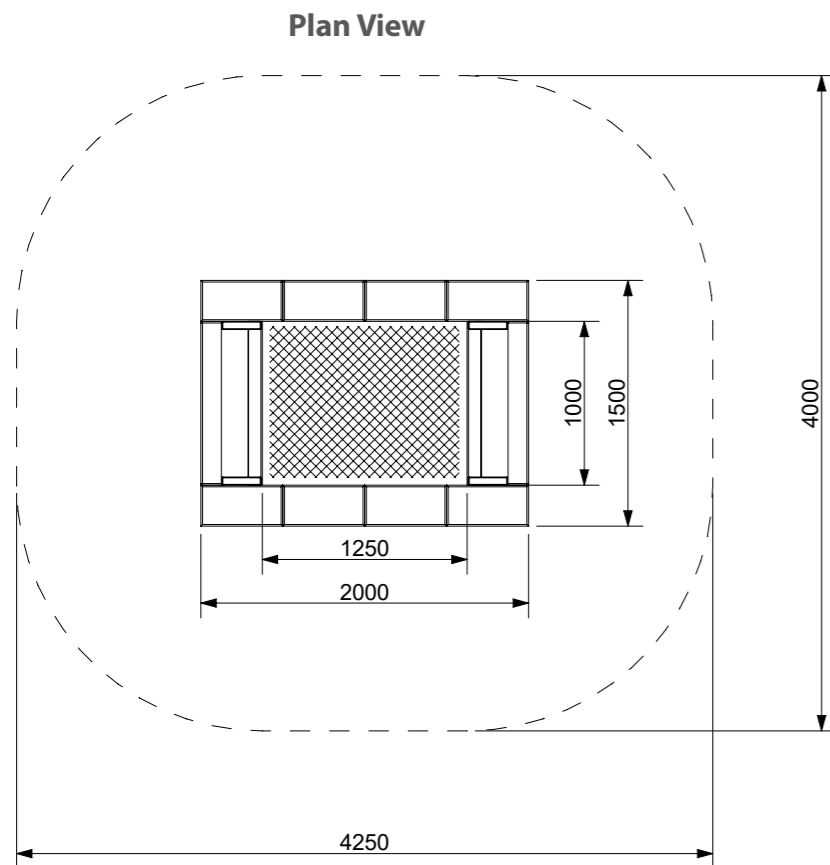

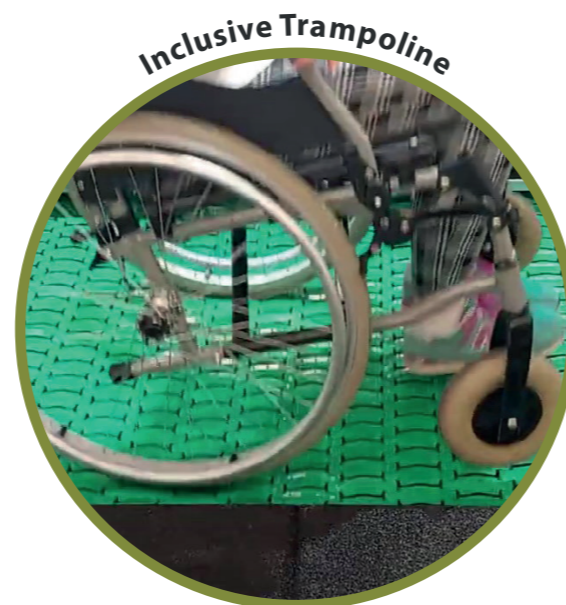

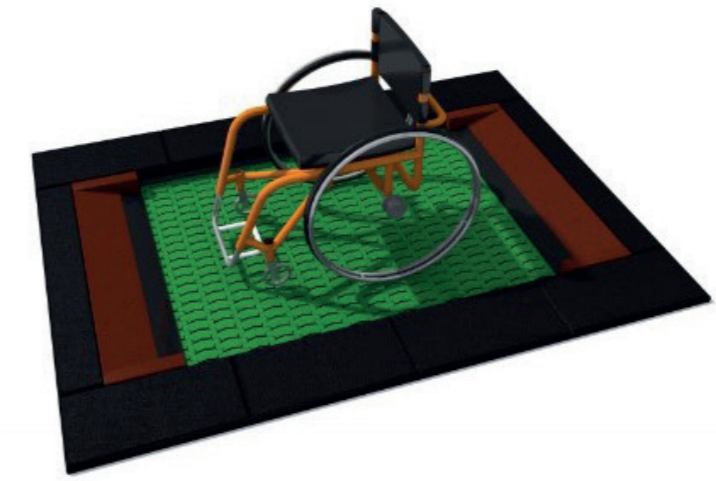

The housing design allows access to the interior for easy cleaning, maintenance or replacement of e.g. a spring.

Features include:

Higher durability – the jumping mat is manufactured using robust non-slip components called lamellas, ensuring very high durability and resistance to breaking and vandalism.

Super Safety – the jumping mat has non-slip structures in the form of alternating linear and circular protrusions. These limit the risk of slipping on the jumping mat.

Less maintenance – the structure of the jumping mat has been designed to prevent small items (e.g. mobile phones or keys) and rubbish from falling into the lower section of the trampoline making it easier to keep clean and maintain.

Specification:

- Resistant to all weather conditions.
- The frame is covered in a polyurethane rubber surface.
- TUV certified galvanised zinc springs
- Jump mat - 37mm long plastic lamellas made of polyamide / modified polypropylene, threaded onto a 6 mm stainless steel cord
- Gaps between lamellas - up to 7mm

Product Specification:

Dimensions:	L: 2.0m W: 1.5m
Jumping Mat Size:	L: 1.25m W: 1.0m
Play Type:	Interactive
Free Fall Height:	0.9m
Foundation Depth:	0.4m
Free Space Required:	4.0 x 4.25m

Safety Surfacing Area:	15m ²
Assembly:	Installation Required
Conformity to EN1176:	Yes
