

Manual Swing Gates

Description

Barkers' swing gates complement our extensive fencing range. All our swing gates are galvanized and powder coated in house to the relevant British standards, guaranteeing that you receive the highest quality product and exceptional service.

Standard configurations include versatile single leaf, double leaf, combination and wicket gates. To ensure gates are the perfect functional and aesthetic match to your fence of choice, we can manufacture bespoke items. Gates can be manufacturer to British Standard.

All gates are fitted with pad lockable dropbolt and slidelatch as standard. Various locking options are available.

We can conform to all major electricity, water and gas board specifications plus our high security tested LPCB and CPNI specifications. And, for extra peace of mind, our premium, patented SafeGuard hinge system can be added. SafeGuard is fully compliant to the BS 1722 pt 9:2016, so you know you're getting the very best performance and protection.

Options

- Single leaf, double leaf or bi-folding
- Inward or outward opening
- 90 or 180 degree opening
- SafeGuard hinges can be added for enhanced safety and performance
- Hasp staple can be added
- Rake bottom option to cope with sloping ground.
