

## IMPORTANT:

To avoid any delay, additional costs, or requested alterations when supplying artwork, please read the following specifications carefully.

### Requested artwork file format:

#### File format: Jpeg

To eliminate the risk of print errors, we request that all artwork files are supplied in jpeg format.

If you are unable to supply a jpeg we can convert your file, however this may incur additional costs.

*(see proof notes on page 4)*

#### Resolution: 300dpi

#### Colour: CMYK

#### 100% actual reproduction size

#### 5mm bleed to all sides

#### No crop or registration marks

### Standard n-Viro™

Standard Chelmer and Wall-mounted n-Viro™ panels allow for full colour printing onto a pre-prepared white base stock in sizes A4, A3, A2, A1, and A0. Any requirement to print to a coloured base stock or to a different size than that mentioned may incur an additional charge and require specific file formats and pre-flight checks. Please call to discuss before submitting any non-standard artwork.

### Fixing holes:

Our standard fixing holes are 8mm in diameter and are located as per the adjacent diagram. Please make an allowance for these when creating your artwork (*bearing in mind that the screw head will be approximately 10mm in diameter*).

For any n-Viro™ panel that requires specific fixing holes we will require a separate vector file showing the page size and the hole positions.

### Supplying artwork:

Please supply you artwork via one of the following methods

#### CD

#### USB Flash Drive

#### email

*(Attachments up to 10 Mbytes in size)*

#### large file internet transfer

via: WeTransfer.com  
*(recommended)*

## General notes

### Proofs

FWDP cannot accept liability for any errors in the finished print if final full size proofs are not supplied with customer artwork, or if the customer has not requested to see full size printed proofs for approval prior to progressing to manufacture. If we have had to convert your file to a compatible file format we may request that you see a hard copy proof and this may incur additional costs.

### Colour Matching

Due to variations in printer calibration and substrate type, we cannot guarantee an exact colour match to client supplied proofs, our own proofs or the finished printed n-Viro™. Should you wish to achieve an exact colour match\*, you should inform us at the outset, and be aware additional costs may be incurred.

*\* Although every effort will be made to achieve accurate colour matching, in certain circumstances this may not be possible.*
