

CASE STUDY

WAVENDON GATE SCHOOL— MK7 7HL

SOVEREIGN
Bringing Imagination into Play

We had the privilege of working with Sally Sheridan, Deputy Headteacher, and her team at the school on a project to install new play equipment. The project began when Sally and her team were looking for two large pieces of play equipment that could cater to a wide age range. After approaching several companies, Sovereign stood out due to our quick and approachable service. Sally appreciated how we were readily available to answer her questions and make quick adjustments to the designs, ensuring the equipment met their specific needs. The school needed a selection that would engage both the youngest and oldest pupils, and the inclusion of a slide was a key requirement. We provided a broad range of options, making it easier for Sally to find the perfect solution for their school's needs. Once settled on the designs, the process moved quickly. The design was delivered in a timely manner, and installation followed soon after. The project's success has led the school to start saving for their next piece of equipment from Sovereign, which is a testament to how well the process went and how satisfied they were with the final result. We're excited to continue our relationship with Sally and the school in the future, providing them with more high-quality, engaging play equipment.

» FEEDBACK

Why did you choose Sovereign for the Project?

"We approached a selection of companies when planning our new play equipment and Sovereign were the quickest and most approachable. From start to finish, Justin was answering my questions and making slight amendments to our design efficiently."

What made Sovereign's design better than any others you received?

"We were looking for 2 different pieces of large equipment for quite a wide age range and found that Sovereign has lots of variety available to us. It was important that we incorporated a slide, and other companies didn't have as large a selection to choose from that would interest both our youngest and oldest pupils."

How did you find the design process?

"The design process was very easy. Justin sent through the designs very quickly and we didn't have long to wait before installation either!"

How did you find the Installation process?

"The installation took place over 4 days and Steve, our installer, was very efficient. He arrived on site before 7:30am every day and left the site tidy every day."

» "For us, Sovereign made the project easy, and we are now saving up for our next piece of equipment from them!"
