

Square Sandpit: CP-SQS

The large square sandpit is constructed using 200 x 100 x 2.4m landscape sleepers, UC4 pressure treated, laid, and secured with overlapping joints and interlocking corners. The top surface is planned with eased corners and C24 graded 145 x 45mm timber providing a top cap and side seat.

Internal pegs are fitted to secure the position and shape with all timbers being bolted together.

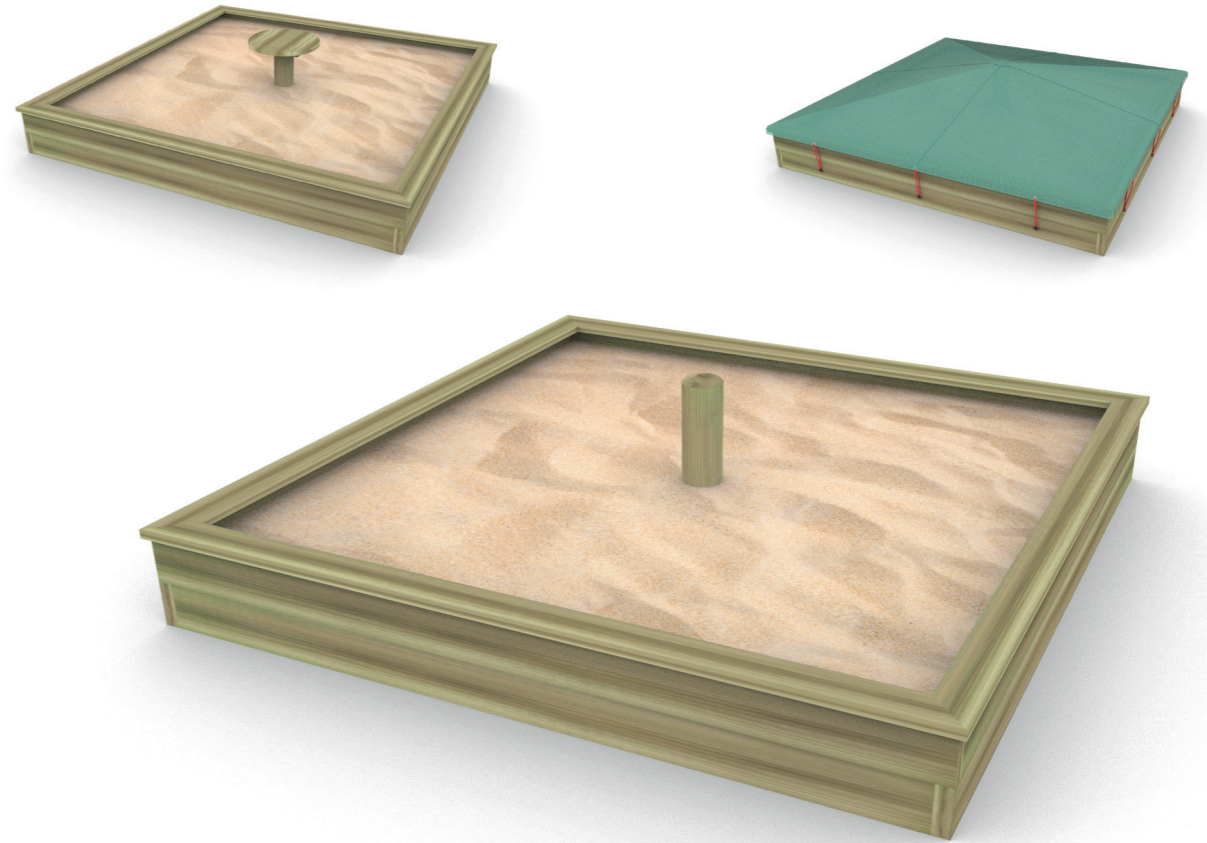

The internal timber surfaces and ground surface are covered with geo-textile fabric, allowing drainage but restricting mud.

A 150cm Ø central post is installed to support a 50mm mesh cover net. This post can be with, or without a cover disc to add play value and spread the load of the mesh net if required.

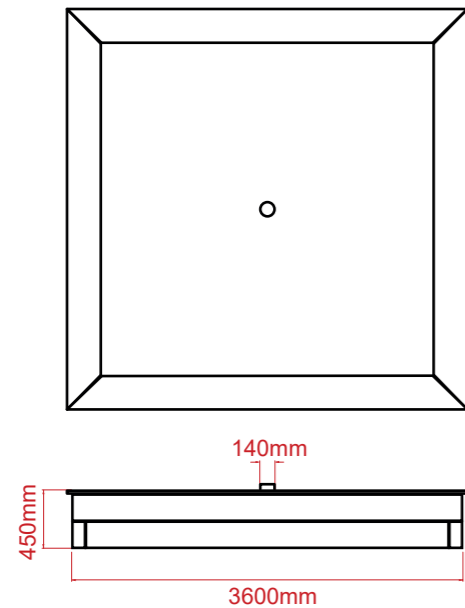

The square sandpit is infilled with approximately 7 tonnes of washed white sand.

Any waste soil that is dug out to level the structure is laid against the outer edge of the sandpit.

Two small timber steps can be fitted to allow easier access for smaller children.

Square Sandpit

Specifications:

Landscape sleepers
Geo-textile water-permeable lining fabric
50mm mesh cover

Product Dimensions:

Dimensions: L: 3.6m W: 3.6m H: 0.45m
Age Range: 3+ years
Play Type: Sensory
Free Fall Height: 0.45m

Safety Surfacing Area: N/A
Assembly: Installation Required
Mass of Heaviest Part: kg
Dimensions of Largest Part: N/A
Conformity to EN1176: Yes
