

Large Outdoor Play Shelter: CP-OPS-6.0

This product is a high quality outdoor play shelter which has a wide variety of uses. It is approximately 6m x 4.5m with a pitched roof, 3 sides, and a timber floor.

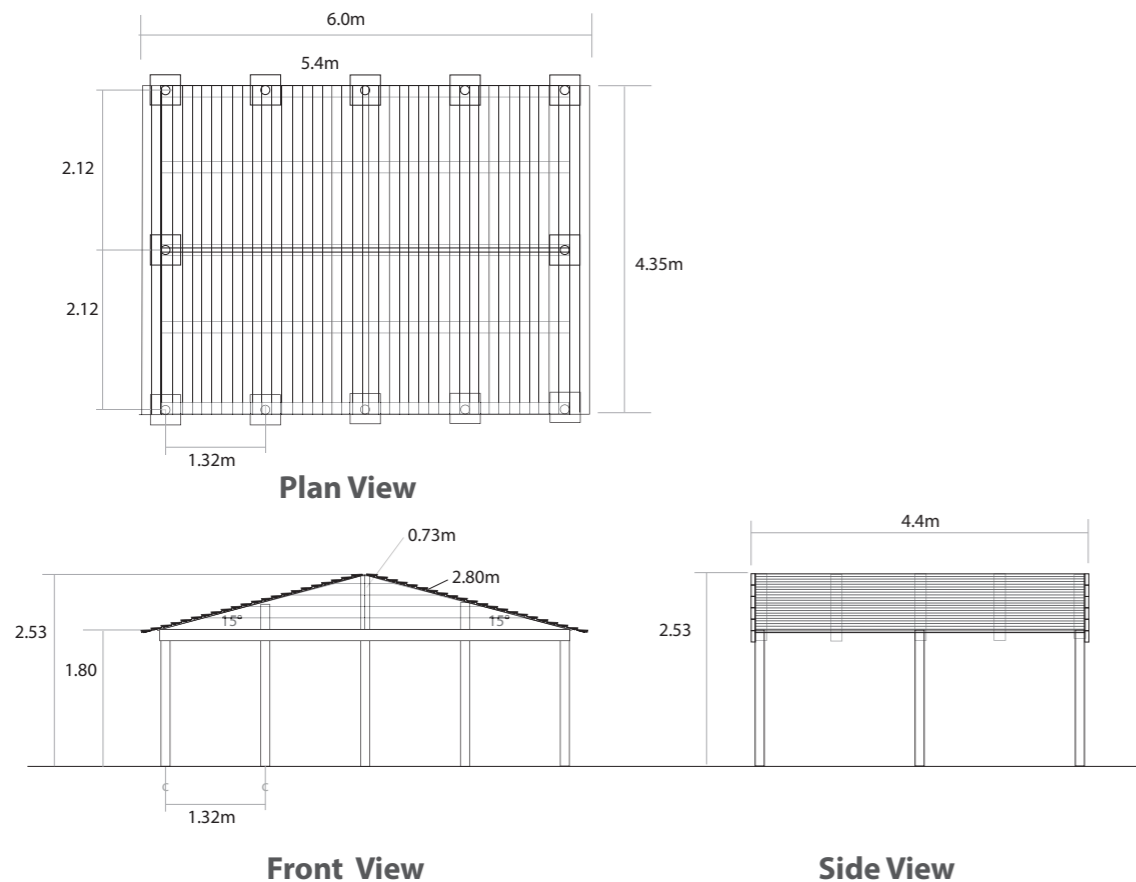

The pitched roof is 2.5m from the apex to the ground and the roofline where it meets the walls is approximately 1.80 high.

It is ideal for schools and nurseries as an outdoor classroom, or as a useful outdoor shelter for tourist destinations and the leisure industry.

This product can be modified with additional seating, an access ramp, or sliding door if required. Alternatively, it can be turned into a covered outdoor sandpit by covering the floor with play sand.

The roof is constructed using quality overlapping panels with dressed timber end cap timbers for a clean finish. We are able to create bespoke sizes to suit the space available, as required.

Timber is a renewable resource, recyclable and biodegradable, and only timbers from sustainably-managed sources are used.
