

PLATI-GRIP™

MULTI-PURPOSE SPIRAL ANCHOR

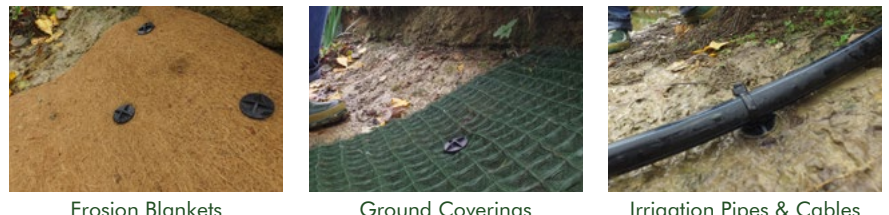

PLATI-GRIP™ is the landscape professional's ideal solution for securing ground materials with ease. Designed by Platipus Anchors, this innovative multi-purpose spiral anchor installs quickly by hand, gripping soil tightly and holding up to 30kg. Perfect for landscape fabrics, ground coverings and erosion blankets, its unique design and high-performance means that fewer Plati-Grip's are usually required to cover a large area, making it extremely reliable and cost-effective, compared to pins / pegs. The integrated zip-tie slot means it can also be used to secure other landscape materials like small pipes, cables and fences. Made from durable, recyclable plastic and fully reusable, Plati-Grip offers a smart, sustainable anchoring solution for any residential or commercial landscaping project.

Benefits of PLATI-GRIP™

- **STAYS FIRMLY ANCHORED IN PLACE!**
- **Ideal for residential & commercial landscape projects**
- **High Performance:**
 - Loads up to 30kg
 - Fast installation
 - Superior fixing secures materials tight to the ground
 - More reliable than pins or pegs
 - Eliminates trip hazards from loose materials
- **Cost Effective:**
 - Fewer Plati-Grip's, greater coverage compared to pins
 - Reduces labour costs associated with refitting loose pins / mat
 - Decreases maintenance visits and material replacement
 - Extremely durable and reusable - Can be recycled
