

Melford Doorway Canopy

The Melford Doorway canopy is a free-standing barrel roof cantilever structure designed to offer shelter at the entrance of buildings. The traditional-looking arched roof allows for rainwater to run off into integrated guttering and drainage through the legs.

Customisable options include:

- Powder coating in a range of RAL colours
- Roof can be clad with 10mm multiwall PET or UV stable, scratch-resistant plastisol
- Bespoke sizes available on request

Advantages of this design include:

- Does not require fixing to the building
- Can be designed to fit the space available
- Barrel roof for water run-off to integrated guttering

Ideal for:

- Entrances
- Business parks
- Schools/Universities
- Hospitals
- Retail/Hospitality

We recommend a 200-300mm gap between the building and the canopy to allow for natural movement.

All our canopies are manufactured to BS EN 1090 standards.
