HILL VIEW PRIMARY SCHOOL - GL3 3LH

SOVEREIGN
Bringing Imagination into Play

Hillview Primary School was in the process of upgrading its outdoor spaces through a series of improvement projects. With ample grounds available for development, the school identified an opportunity to enhance play provision and encourage more active use of the space. As a starting point, the school focused on introducing new climbing equipment, recognising the importance of promoting physical activity, strength, and coordination, while also giving children a fun and engaging way to play together.

» "I've had the pleasure of working with Hillview Primary School over several years to enhance their outdoor spaces with a variety of engaging play equipment. Together, we have installed features including a Space Net, Monkey Bars, and a Scramble Net, all complemented by natural rubber mulch surfacing for added safety and protection."
