COPYTHORNE PRE-SCHOOL - SO40 2HP

SOVEREIGN
Bringing Imagination into Play

The preschool aimed to improve their outdoor play area, creating a more engaging and comfortable environment for the children. With a generous budget but unsure where to begin, they sought expert guidance to assess the space, recommend suitable play equipment and a large permanent sun shade, and provide cost estimates. Having browsed our brochure, the client commented that they loved it, as it showcased many of the ideas they had envisioned.

>> "The preschool had a blank canvas to work with, a fully fenced area perfectly suited for a brand-new playground development. This space offered endless possibilities to create a fun, safe, and inspiring outdoor environment. The design brought together a variety of exciting features, including a Play Ship, Activity Panels, a Shade Sail Canopy, and a Wetpour Roadway, all thoughtfully designed with the children in mind."
