BURSTOW PRIMARY SCHOOL - RH6 9PT

SOVEREIGN
Bringing Imagination into Play

Having previously worked with the school on playground surfacing, we were invited to support them again as they looked to upgrade one of their key play areas. The school had an old adventure tower that had reached the end of its life and needed replacing. They wanted a new structure of a similar nature, complemented by modern, safer surfacing, to ensure the children continued to have access to play equipment that could accommodate multiple users at once while promoting active play, cooperation, and social interaction.

» "The school opted for a Drapeau Adventure Tower for its versatility and variety of play options. The structure comprises three interconnected towers, each featuring different activities such as a rock climber, rope wall climber, tunnel bridge, and other engaging elements. The new equipment provides a safe and exciting space where the children can continue to play and develop together."
