

## Origin' (technical specification)

J49200

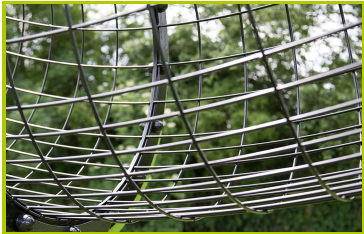

1- **The different posts** are made from sap free robinia. The robinia is sanded and has had its bark removed. Robinia is naturally rot proof and does not require any additional chemical protection; it is equally extremely resistant to attacks from external sources (insects, fungi, climatic variations), guaranteeing the long term durability of the playground equipment.

2- **The boards** are made from natural robinia wood or Douglas fir (plank sizes: 22, 27 and 45mm). Robinia wood and Douglas fir are naturally rot proof and do not require any additional chemical protection; they are equally extremely resistant to attacks from external sources (insects, fungi, climatic variations), guaranteeing the long term durability of the playground equipment.  
The coloured panels are using a staining process.

3- **The 16mm diameter ropes** are made of galvanised steel cable covered with polyester. The cables are linked together and held in place by injected polyamide spheres.

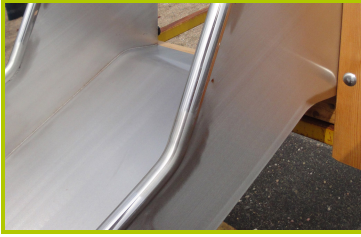

4- **The tunnel** is made of steel mesh netting, Ø 6mm, with Rilsan plastic covering.

5- **The panels** are made of stainless steel mesh netting, Ø 6mm.

6- **The tubular slide** is made of stainless steel.

7- **The slide** is made of stainless steel.

8- **The chains** are made of stainless steel.

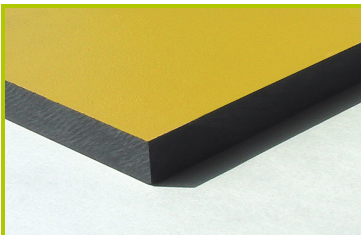

9- **The abacus pieces** are made from natural Robinia wood or Douglas fir. The rail is made from 10mm diameter stainless steel.

10-**The spheres** are made of polycarbonate sheets.

11-**The climbing holds** are made of polypropylene. They are non-toxic, inflammable and shock and UV resistant.

12-**The flags** are made from a 13mm thick compact material (HPL). Robust in construction, it has excellent weather and vandal resistance properties.

13-**The fixings** are made of stainless or plated steel and protected by anti-vandalism polyamide caps.
