

Water Play

(technical specification)

J49148

1- The different posts (average diameter: 60 to 80mm / 120 to 140mm / 140 to 160mm / 250 to 300mm) are made from sap free robinia. The robinia is sanded and has had its bark removed. Robinia is naturally rot proof and does not require any additional chemical protection; it is equally extremely resistant to attacks from external sources (insects, fungi, climatic variations), guaranteeing the long term durability of the playground equipment.

2- The boards are made from natural robinia wood or Douglas fir (plank sizes: 22, 27 and 45mm). Robinia wood and Douglas fir are naturally rot proof and do not require any additional chemical protection; they are equally extremely resistant to attacks from external sources (insects, fungi, climatic variations), guaranteeing the long term durability of the playground equipment.
The coloured panels are using a staining process.

3- The fixings are made of stainless or plated steel and protected by anti-vandalism polyamide caps.
