

Climbing and balancing trails

(technical specification)

J4906

1- **The different posts** (average diameter: 100 to 120mm / 120 to 140mm) are made from sap free robinia. The robinia is sanded and has had its bark removed. Robinia is naturally rot proof and does not require any additional chemical protection; it is equally extremely resistant to attacks from external sources (insects, fungi, climatic variations), guaranteeing the long term durability of the playground equipment.

2- **The beams** are made from natural Robinia wood or Douglas fir (plank sizes 45 x 68mm). Robinia wood or Douglas fir is naturally resistant and long lasting.

3- **The fixings** are made of stainless or plated steel and protected by anti-vandalism polyamide caps.
