

Kanopé

(technical specification)

J56002

1- **The 95 x 95mm posts** are made of painted galvanised steel, ensuring robustness and durability.

2- **The 125mm diameter posts** are made of painted galvanised steel. The caps are made of injection moulded polyamide.

3- **The coloured panels** are made from a 13mm thick compact material (HPL). Robust in construction, it has excellent weather and vandal resistance properties.

4- **The platform** is made from a 12.5mm thick textured and non-slip compact material (HPL).

5- **The slatted fences** are produced using post-consumer waste, mainly recycled food and drinks containers (polyethylene, aluminium). This environmental impact reducing material is an inert and robust compound which is hard-wearing, resistant to UV light and fluctuations in temperature, and able to retain its shape over time. It is also rot-proof, making it a reliable option for outdoor applications.

6- **The fixing elements** are made of injection moulded polyamide.

7- Injection moulded polyamide fixings connect the posts with the platforms and the various play features. They are non-toxic, flameproof and U.V. resistant. The thickness of the polyamide makes the equipment both strong and vandal resistant.

8- The tubes are made of stainless steel, guaranteeing lasting durability and reliability of the equipment.

9- The 16mm diameter ropes are made of galvanised steel cable covered with polyester. The cables are linked together and held in place by injected polyamide spheres.

10-The seats are made with a non-slip rubber overmould.

11-The grip section of the stainless steel handle is overmoulded with rubber to give a good grip.

12-The one-piece rail is made of stainless steel, Ø 76.1mm, 3.6mm thick. The trolley is made of stainless steel ensuring its durability.

13-The fixings are made of stainless or plated steel and protected by anti-vandalism polyamide caps.
