

 **NatraTex**[®]

We pride ourselves on supplying quality products; our aim is to be the Number One Supplier of Choice. Our customers range from blue-chip multi nationals to private home owners, and our friendly and dedicated team is always available to advise you on the right product for you.

If you're looking for coloured surfacing, then **BituChem Asphalt Ltd** manufactures and supplies durable, fully bound asphalt surfaces for surfacing contractors in England and Wales.

Our asphalt is divided into two distinctive lines, **NatraTex Cotswold** and **NatraTex Colour**, both of which are available as part of our Eco range. Our fully bound surfacing is highly durable and is extremely low maintenance.

Innovative preservation and surfacing products

Journey to Net Zero

Championing recycling whilst reducing your carbon footprint

NatraTex Eco is a sustainable landscaping material manufactured as LTA (lower temperature asphalt) at temperatures 30-40% lower than conventional asphalt. This reduction in temperature results in decreased greenhouse gas emissions during production.

Further sustainability can be achieved with a material containing up to 50% recycled mixed aggregate, only if colour and aesthetics isn't a priority.

NatraTex Eco can be used similarly to NatraTex Colour and NatraTex Cotswold. It serves as a sustainable surface for driveways, footpaths, playgrounds, multi-use games areas, cycle lanes, and decorative landscaping.

Additionally, it comes in a wide range of vibrant colour variations.

NatraTex Cotswold's modern design offers numerous benefits – including environmental ones – that make it a much superior product to traditional bituminous macadam. NatraTex Cotswold is an asphalt surface course, based on a unique design featuring similar characteristics to conventional macadam and resin.

NatraTex Cotswold is manufactured and supplied in 2 buff shades (Buff 1 and Buff 2) to surfacing contractors.

This results in a cost-effective and multi-purpose surfacing material that is sympathetic to surrounding environment and is perfect for aesthetic applications such as park footpaths, cycleways, playgrounds, school surfacing, decorative landscaping or domestic use.

Creative surface zoning with fully bound asphalt

 **NatraTex**[®]
Colour

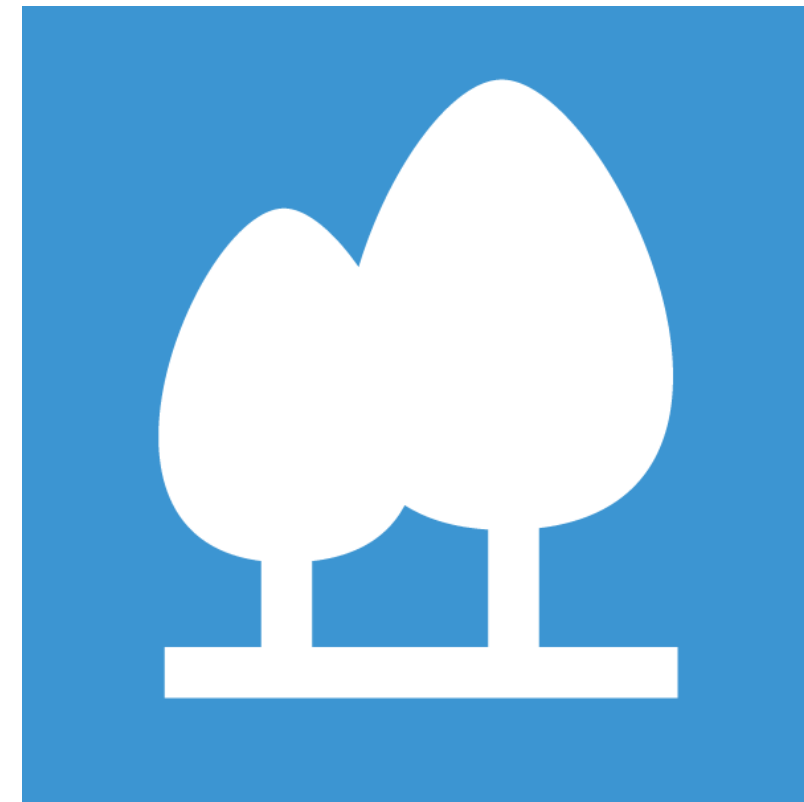

If you're looking for coloured surfacing, then NatraTex manufactures and supplies durable, coloured asphalt surfaces for surfacing contractors in England and Wales. Our fully bound surfacing is highly durable and is extremely low maintenance.

By adding coloured pigment NatraTex Colour will provide a bold and lively colour scheme; giving you the option of coloured paving that would make a great addition to any decorative landscaping!

This results in a cost-effective and multipurpose surfacing material that is perfect for highways demarcation, footpaths, cycleways, playgrounds or domestic use.

Recommend for...

Recreational

NatraTex is ideal for surfacing in recreational projects. It is regularly used in the creation of Multi-Use Games Areas, playgrounds and cycle paths.

This is because, as a hard-wearing and attractive surface course, NatraTex is high performing in heavy use areas and can be applied in a wide range of colours for a vibrant finish.

Regeneration

Preserving areas of beauty and ensuring public areas are accessible to all is top priority for many local councils and organisations. To support with this, NatraTex can be used as a surface course for Regeneration projects.

A sympathetic, natural coloured asphalt surface course, NatraTex is durable, low maintenance and attractive. This makes it the ideal choice for Regeneration projects, whether it is used in replacement of gravel footpaths or in the course of hard landscaping to create cycle paths or decorative paving.

Residential

Curb appeal is everything when selling homes! From access roads to driveways and courtyards, NatraTex can be used to provide a beautiful finish to residential housing developments.

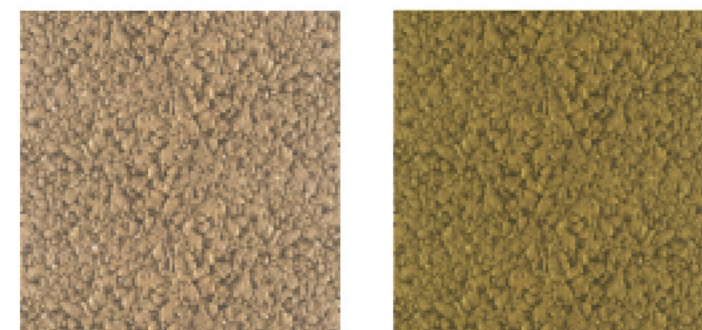

Sympathetic to the environment and hard wearing, NatraTex surface courses lend themselves to residential projects due to their luxurious finish. What's more, NatraTex Cotswold and NatraTex Colour require very little maintenance to keep them looking aesthetically pleasing, even in busy areas.

Retail

NatraTex decorative paving and hard landscaping can be used to create car parks, footpaths and access roads for retail projects. An attractive, durable and hard wearing surfacing material, both NatraTex Cotswold and NatraTex Colour are ideal for creating outdoor spaces that both look and perform fantastically.

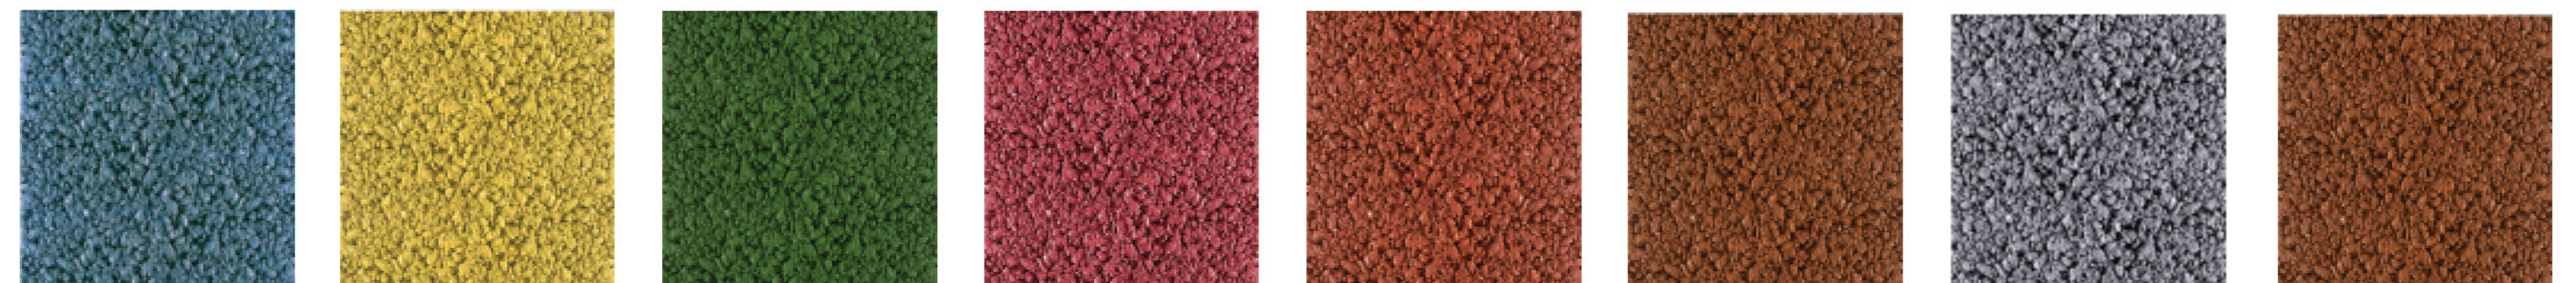

In creating retail areas which harmonise with your brand, everything needs to stand out and look the part. Therefore, NatraTex products can be used to demarcate vehicular or pedestrian areas and provide an outstanding finish on retail parks, car parks and outside shops and offices.

ChipTex[®]

**Cost effective,
readily available,
hard landscaping solution**

What is ChipTex

Our coloured ChipTex range enhances conventional black asphalt whether for appearance or for demarcating a specific area.

ChipTex is designed to give conventional Hot Rolled Asphalt (HRA) a cost-effective colour demarcation and enhancement, as well as increased durability. Chippings are coated in clear binder & pigmented before simply being rolled into the surface at the time of laying, enabling the colour to be maintained throughout its lifetime.

NatraTex ChipTex is supplied in a 10mm or 20mm aggregate, a variety of colours and delivered in 25kg buckets, bulk bags or in bulk.

- ✓ Decorative
- ✓ Minimal maintenance
- ✓ Cost effective
- ✓ Delivery available
- ✓ Suitable for traffic
- ✓ Unique design
- ✓ No supply issues

ChipTex uses

- Pedestrian areas
- Speed restrictions
- Village gateways
- Highways
- Cycle & bus lanes
- Demarcation
- Schools

What is Coldlay

Tired of patching vibrant, decorative asphalt with unsightly black repairs? Preserve the beauty of your surfaces with the NatraTex ColdLay Kit - a coloured solution that maintains the aesthetic integrity and professional finish your project deserves.

NatraTex ColdLay kits provide a quick, solution for small surface repairs in NatraTex or similar decorative asphalt. This easy-to-use system ensures strong joint sealing and long-lasting performance for non-vehicular areas such as around bollards and signposts or any small utility works. Supplied with ClearJoint

Colour-Matched Repairs:

Maintain the original look of your decorative surfaces no more mismatched black patches.

Easy Application:

Supplied in a sealed 25kg bucket with Clear Cold Seal paint

Ideal for small repairs:

especially in non-vehicular areas (e.g., around bollards and signposts or small utility repairs).

Professional Finish:

Achieve a clean, durable repair by following simple steps.

Quick Curing:

Isolate the area for just 12–24 hours for full cure.

Protect Your Reputation:

Deliver repairs that blend in seamlessly, keeping clients happy and your work looking its best.

Available in:

25kg Bucket
