

Noale Seat

The Noale Seat is a bench available in configurations with or without a backrest and armrest, featuring a tubular steel structure with steel sheet supports and two perforated plates for secure ground fixation. Both the seat and backrest are constructed from steel rods.

To enhance durability and protect against corrosion, all metal components, including the structure, supports, seat, and backrest, undergo galvanisation and are coated with thermosetting polyester powder. The fixings used are crafted from AISI304 stainless steel.

The bench is prepared with pre-drilled holes for ground fixing, although mechanical dowels for this purpose are not included and would need to be sourced separately. This design ensures stability and allows for versatile placement in various indoor and outdoor settings.

L: 1750mm x W: 546mm x H: 808mm / Seat H: 443mm
