

DARTMOOR SEDUM ROOF SHELTER

Fully customisable shelter supporting BREEAM and biodiversity

The Dartmoor Sedum Roof Shelter is a premium, design-led cycle shelter that places sustainability at the heart of its construction. Built as an inherently green-roof unit, the Dartmoor features a fully integrated sedum shelter, delivering tangible BREEAM and biodiversity developments. Manufactured in the UK, its robust 80 mm SHS steel frame provides lasting structural integrity, while the exterior can be clad in any material allowing the shelter to complement both natural and contemporary environments. Every Dartmoor unit is made to order, offering full flexibility across dimensions, materials and internal configurations. Optional upgrades such as PIR-activated lighting, access control and integrated drainage ensure the shelter meets the highest standards of performance, design and environmental compliance.

- › **Inherent Green-Roof Design:** Integrated sedum green roof system enhances biodiversity and contributes to BREEAM targets.
- › **Architectural Flexibility:** Fully customisable cladding, including; timber, steel, mesh or composite finishing.
- › **Premium Frame Construction:** Heavy duty 80mm SHS steel frame, hot-dipped galvanised to BS EN ISO 1461:2022.
- › **Sustainable Materials:** FSC-certified timber options available with low-VOC finishes
- › **Lighting & Access Control:** PIR-activated IP65-rated LED lighting and swipe-card or code access.
- › **Built to Last:** Manufactured in Britain and backed by 10-year warranty
- › **Full Installation Service:** Nationwide delivery and installation by qualified professionals.
