

E-BIKE CHARGING ORIGINAL SHELTER

Future-Proof Your Site with Integrated E-Bike Charging

As the shift to electric transportation accelerates, your project needs to stay ahead. Our E-Bike Charging Shelter is a complete solution for secure e-bike storage and on-site charging, designed for commercial developments across the UK. Combining robust construction with innovative charging capabilities, this shelter enhances your sustainability offering while supporting employees, tenants, or visitors who commute by e-bike. The shelter is secure by design, from its sturdy galvanised frame to lockable access features, it is built to prevent vandalism and theft. Each stand integrates dual 13-amp weather-sealed sockets. That's ten outlets across the five charging stands, enough to fully support modern e-bike fleets. Further, the range from open-fronted units to fully enclosed shelters means the E-Bike Charging Shelter can be customised in size, finish, and layout to match your site's needs.

- › **Dimensions:** 4100mm (W) x 2100mm (D) x 2100mm (H)
