

FREE-STANDING VERTICAL BIKE RACK

Space Saving and Flexible Storage Solution

The Freestanding Vertical Bike Rack is the perfect space-saving solution for areas where wall-mounted systems aren't practical. Designed to accommodate any number of bikes, this modular, robust storage rack can be configured as a single run or back-to-back island, maximising floor space usage and offering complete layout flexibility. Constructed from a heavy-duty 50mm square hollow section (SHS) tube, this rack is built to withstand high-traffic environments while providing secure storage by both the wheel and frame delivering BREEAM compliance and long-lasting reliability. Ideal for a wide range of locations, from schools and office buildings to train stations and universities, this made to order rack system is a great fit for commercial and public spaces where bike storage density, security and layout versatility are essential.

- › **No Wall Space? No Problem:** Freestanding design ideal for open-plan spaces.
- › **Modular & Made to Order:** Choose the number of racks and configuration to suit your layout.
- › **High-Density Storage:** Back-to-back design allows central islands and efficient space use.
- › **Secure by Design:** Supports bike by both frame and wheels for enhanced stability and BREEAM compliance.
- › **Durable British Quality:** Manufactured in the UK from 50mm SHS steel, hot dipped galvanised to BS EN ISO 1461:2022
- › **Optional Finishes:** Upgrade to black PPC finish for a sleek, modern look (additional cost)
- › **Fast Turnaround:** UK fabrication enables quick production and delivery times.
- › **Sustainable Choice:** Compliant with the Code for Sustainable Homes and BREEAM standards.

PROJECT

30 Fenchurch Street

30 Fenchurch Street, a key office development in the heart of London, has long been a centre for global trade, housing major financial institutions and consultancies. With the rise in cycling among commuters, the existing bike storage facilities at this bustling building were no longer sufficient to meet the growing demand. Our team was brought in to design and install a new, high-capacity bike storage solution within the car parking area. After conducting a site survey, we worked closely with the client to create a bespoke internal bike store with 193 cycle spaces. We maximised 138 Two Tier Racks for high-density storage to maximise the limited space.

Additionally, 20 Vertical Bike Racks, 18 Free Standing Vertical Bike Racks, and 2 Sheffield Stands were strategically placed to optimise further - space efficiency. The Free Standing Vertical Bike Racks were particularly valuable, as their flexible design makes them ideal for space-constrained areas. The installation included 33 Folding Bike Lockers, powder-coated in Zinc Yellow, and a Public Maintenance Stand to encourage safe and convenient cycling. To ensure security, we enclosed the facility with Twin Wire Security Mesh Partitioning and access-controlled gates. All products from galvanised British steel come with a 10-year manufacturer's warranty and a 15-year rust guarantee, ensuring long-term durability.
