

PREMIUM VERTICAL BIKE RACK

Turn Your Walls Into High-Performing Cycle Storage

The Premium Vertical Bike Rack is a wall-mounted storage solution that blends form and function, ideal for projects that demand space efficiency without compromising on visual impact. Designed to transform underutilised wall space into premium and secure cycle storage, this rack has become a staple in End of Trip Facilities across the UK. Available in a wide range of RAL colours and gloss levels, the Premium Vertical Rack is often specified in contrasting tones to complement interiors or reinforce brand identity. Whether designing a workplace, residential development or commercial space, this wall-hung solution helps deliver durable, BREEAM-compliant bike storage that looks as good as it performs. The Premium Vertical Bike Rack is the go-to sleek, wall-mounted solution designed to maximise space.

Bikes with front-wheel mudguards are incompatible

- › **Space-Saving Vertical Storage:** Optimises internal walls for compact cycle storage.
- › **Architect-Specified Design:** Frequently used in premium, design-led projects.

PROJECT

Queens Quay, Bristol

At Queens Quay in Bristol, a £5.6m refurbishment led by Aberdeen Standard Investments and AWW Architects transformed a tired four-storey office block into a bright, modern workplace with best-in-class sustainability credentials, including BREEAM Excellent and WiredScore Platinum. As part of a full M&E and sustainability consultancy package, Method supported the creation of high-quality End Of Trip facilities complete with showers, changing rooms, and a dedicated cycle storage area in the basement.

As part of this high-spec facility, we supplied and installed 27 Premium Vertical Bike Racks, British-made, BREEAM-compliant, and finished in a custom RAL powdercoat. The racks were chosen for their space efficiency and ability to secure both wheel and frame, making them ideal for a compact, high-use cycle hub. We also provided Westminster Lockers with integrated bench seating built from moisture-resistant materials and finished in high-pressure laminate for durability and style to complement the bike storage. Together, these products deliver a functional, attractive, and future-ready cycle amenity that enhances the building's tenant experience and sustainability goals.
