

SOLO VERTICAL BIKE RACK

Secure, Compliant & Cost-Effective

The Solo Vertical Bike Rack is a space-saving, freestanding cycle storage solution designed for high-density bike storage in commercial, residential, and public spaces. Built for maximum flexibility, it requires no wall mounting, making it ideal for environments where fixed or wall-mounted racks aren't practical. Its sleek vertical design ensures bikes are stored securely by both the frame and wheels, providing BREEAM compliance and peace of mind. Whether used independently or integrated into a larger storage layout, the Solo Vertical Rack is a smart, affordable solution built to last and proudly manufactured in the UK using galvanised British steel. Whether you're looking for storage for a residential block, workplace, or public site, the Solo Vertical Rack delivers practical bike storage that doesn't compromise quality or design.

- › **Freestanding Design:** No wall mounting required, ideal for tighter or flexible layouts.
- › **High-Density Storage:** Store more bikes using less floor space.
- › **Secure by Design:** Lockable through both frame and wheels for security and BREEAM compliance.
- › **Durable & Weather-Resistance:** Galvanised to BS EN ISO 1461:2022 for long-term outdoor use.
- › **Flexible Layouts:** Can be staggered or custom spaced to suit your needs.
- › **Powder Coating Available:** Choose from a wide range of colours on request.
- › **10 Year Warranty:** Built to stand the test of time with long-lasting guarantee.
- › **Made in Britain:** Manufactured using high-quality British steel
- › Please Note: Bikes with front-wheel mudguards are not compatible with the rack.

PROJECT

Battersea Power Station

The Bike Storage Company is proud to announce our latest collaboration with the iconic Battersea Power Station following the successful completion of our second installation at this historical landmark. This ambitious restoration project, led by renowned architect WiliksonEyre, aimed to preserve the power station's rich heritage while adapting it to serve as a modern residential, commercial, and recreational hub.

Originally designed by Sir Giles Gilbert Scott in the 1930s, Battersea Power Station supplied one-fifth of London's electricity until its decommissioning in 1983. Today, this Grade *II listed building has undergone significant transformations, retaining its iconic features, such as four chimneys and massive brick outline, while incorporating new spaces for events, shops, restaurants, offices, and residences.

In Phase 3b of the development, The Bike Storage Company provided state-of-the-art bike storage solutions to accommodate the increasing number of residents and visitors. We aimed to deliver secure, user-friendly, and aesthetically pleasing storage options that align with the power station's architectural integrity and heritage.
