

Traditional equipment (technical specification)

J448

1- **The posts with average diameter 120 to 140mm** are made from sap free robinia. The robinia is sanded and has had its bark removed. Robinia is naturally rot proof and does not require any additional chemical protection; it is equally extremely resistant to attacks from external sources (insects, fungi, climatic variations), guaranteeing the long term durability of the playground equipment.

2- **The braided rope seat** is made of galvanised steel, covered in polyester. The connecting parts are in painted aluminium. The seat is fitted to a stainless steel frame structure, made up of two 40 mm diameter posts, and is suspended from small link stainless steel chains.

3- **The double jointed swing mechanism** is made of stainless steel.

4- **The fixings** are made of stainless or plated steel and protected by anti-vandalism polyamide caps.
